Seligman's bibliography concentrates on books, manuals, journals, and catalogs covering a wide range of sartorial approaches over nearly five hundred years. After a historical overview, Seligman approaches his subject chronologically, listing items by century through 1799, then by decade. In this section, he deals with works on flat patterning, draping, grading, and tailoring techniques, as well as on such related topics as accessories, armor, civil costumes, clerical costumes, dressmakers' systems, fur, gloves, leather, military uniforms, and undergarments. Seligman then devotes a section to those American and English journals published for the professional tailor and dressmaker. Here too, he includes the related areas of fur and undergarments. A section devoted to journal articles features selected articles from costume and noncostume-related professional journals and periodicals. The author breaks these articles down into three categories: American, English, and other. Seligman then devotes separate sections to other related

areas providing alphabetical listings of books and professional journals for costume and dance dolls folk and national dress footwear millinery and wigmaking and hair A section devoted to commercial pattern companies periodicals and catalogs is followed by an appendix covering pattern companies publishers and publications In addition to full bibliographic notation Seligman provides a library call number and library location if that information is available The majority of the listings are annotated Each listing is coded for identification and cross referencing An author index a title index a subject index and a chronological index will guide readers to the material they want Seligman s historical review of the development of publications on the sartorial arts professional journals and the commercial paper pattern industry puts the bibliographical material into context An appendix provides a cross reference guide for research on American and English pattern companies publishers and publications Given the size and scope of the bibliography there is no other reference work even remotely like it

D. F. Vincent,2025-10-20 Time tries all things and no better test can be desired than the fact that after years of widespread recognition as a standard work on Cutting and Practical Tailoring this book has so grown in favour that edition after edition is demanded This the tenth part deals with all kinds of Waistcoats and similar garments and though it comes late in the series it is not by any means the least important class of garments the tailor is called upon to produce No pains have been spared either by author artist or printer to make this part a worthy companion of the preceding ones In conclusion we can justly make a further quotation from the Preface of Part One which will be found to apply with equal force both to the individual part now before us and to the Cutter s Practical Guide Volumes as a whole Very rarely if ever has a work so comprehensive been published in connection with the Art of Cutting as this great work by Mr W D F Vincent , **The Cutter's Practical Guide, Part 8** John Falconer,W. D. F. VINCENT,2025-08-04 The importance and necessity of just such a work as this on Economy in Cutting has found ample proof in the disposal of the First Edition in less than one month in a Second Edition being again exhausted and in our now being called upon to introduce a Third Such a work is bound to be popular its advantages come so closely home to every cutter and we are pleased to record that the efforts of both Author and Publisher have been so fully appreciated From no other publishing firm has emanated so many works relating to cutting fitting and practical tailoring and so much is the time

and attention of cutters devoted to these features of their profession that the matter of Economy in Cutting is in many cases perhaps comparatively a secondary consideration. It is true that in the cutting of a garment saving a quarter of material is of small importance when compared with its good or bad fit. But where from experience or the use of our Tailor and Cutter Reliable Model and Special Patterns the fit may be pretty well assured even a quarter of material on each coat cut would very soon bulk to a tolerably large amount. At the present time when competition runs so high and prices must be cut so fine it became forcibly impressed upon us that a work might very advantageously be entirely devoted to ECONOMY IN CUTTING. We had little difficulty in selecting an author of thorough practical experience for this work Mr Falconer having devoted special attention to the matter of Economy. The completeness with which Mr Falconer has done his work will be found in the fact of its containing no less than thirty six Plates illustrating different lays ranging from one to four garments on each lay or illustration. The Tables describe the Plates giving the garment or garments their sizes and the quantities of material from which they can very comfortably be cut.

A History of the Paper Pattern Industry Joy Spanabel Emery, 2014-04-24

Sewing patterns have been the principle blueprint for making garments in the home for centuries. From their origins in the tailoring manuals of the 16th century to the widely produced pamphlets of the 18th and 19th centuries through to the full size packet patterns of today their history and development has reflected major changes in technology such as the advent of the sewing machine retailing and marketing practices the fashion periodical and shifts in social and cultural influences. This accessible book explores this history outlining innovations in patternmaking by the companies who produced patterns and how these reflected the fashions and demands of the market. Showcasing beautiful illustrations from original pattern pamphlets packets and ads as well as 9 complete patterns from which readers can reproduce vintage garments of different eras the book provides a unique visual guide to homemade fashions as well as essential exploration of the industry that produced them.

We take great pleasure in presenting this Work to the trade confident that it will meet a long felt need. Although it addresses garments somewhat beyond the usual scope of tailoring practice they nevertheless form a legitimate and indeed essential part of it. There is no more reason to decline orders for such garments simply because certain firms have chosen to specialize in them than there would be in refusing to make a pair of breeches or any other item that naturally belongs within the tailor's craft. It is the duty of every progressive house to embrace those branches which though sometimes neglected are vital to the

completeness of a craftsman s repertoire As regards the Work itself the systems instructions and details of execution we submit with confidence that they will be found both reliable and of genuine practical service They are not the product of theory or speculation but rather of one who has gained wide and varied experience in this particular branch of the trade and is therefore well qualified to speak with authority Both the diagrams and the accompanying text have been prepared with the greatest care uniting clarity with refinement Every line has been drawn with precision and every explanation phrased with utmost attention so that the student may proceed with confidence and the experienced practitioner may find their skill further enriched No effort has been spared to make this Work worthy of its title a genuine Guide to Shirt Cutting not merely a compilation of rules but a practical manual filled with hints and suggestions of lasting value to both learner and expert
