Ufh History Question Papers:

A Global History of Anti-Apartheid Anna Konieczna, Rob Skinner, 2019-04-15 This book explores the global history of anti apartheid and international solidarity with southern African freedom struggles from the 1960s It examines the institutions campaigns and ideological frameworks that defined the globalization of anti apartheid the ways in which the concept of solidarity was mediated by individuals organizations and states and considers the multiplicity of actors and interactions involved in generating and sustaining anti apartheid around the world It includes detailed accounts of key case studies from Europe Asia and Latin America which illustrate the complex relationships between local and global agendas as well as the diverse political cultures embodied in anti apartheid Taken together these examples reveal the tensions and synergies transnational webs and local contingencies that helped to create the sense of being global that united worldwide anti apartheid campaigns

Anchored in Place Leslie Bank, Nico Cloete, 2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges
