Prospecting in Areas of Glaciated Terrain - 1982 P. H. Davenport, 1982 *The Design, Synthesis, and Virtual Screening of Spirocyclic Ketals as Prospecting Library Members* Ryan Paul Trump, 2001 Identification And Suppression of Multiple Reflections in Seismic Prospecting Evgeniĭ Alekseevich Kozlov, 1988-12 This monograph is concerned with the three main aspects of dealing with multiple reflections in seismic prospecting and aims to substantiate a set of new techniques for their more effective suppression To increase the accuracy of the Earth's physical parameter estimates 1 D 2 D and 3 D cases earlier time intervals for seismic records are used in combination with the subtraction of predicted materials from target intervals in the course of seismic data inversion The automated identification of multiple events on seismic records in the course of data interpretation is discussed with the aim of improving the reliability with which structural and stratigraphic traps can be located In order to increase the signal to noise ratio modern techniques for the suppression of multiples on either 2 D or 3 D records based on the difference between propagation velocities of multiple and primary waves in the course of data processing are considered The book provides a description of general concepts then focuses on the methodology of data processing and interpretation including theory computational algorithms stability and noise immunity considerations Special attention is given to the practical implementation of the techniques proposed Finally using a large amount of both model and real data examples the book illustrates how to improve the resultant seismic data by the use of developed multiple identification and suppression techniques in various geologic environments *Atlantic Geology*, 1997 **Prospecting in Areas of Glaciated Terrain, 1977**, 1977 Terrorism and Political Contention János Besenyő, Leonid Issaev, Andrey Korotayev, 2024-04-02 Against the backdrop of terrorist activity and the emergence of new conflicts in the MENA region this book identifies factors of political contestation and analyzes organizational forms and dynamics of terrorism and conflict in North Africa and the Sahel Written by an international selection of authors from different fields the book covers topics such as the radicalization of terrorist organizations operating in the region the financing of terrorism the role of migration the radicalization of women the influence and motives of great powers and external factors such as France in the region and the impact of the war in Ukraine The book appeals to scholars and students of politics and international relations as well as African and Middle Eastern studies **Drift Prospecting** R. Inverse Problems for Partial Differential Equations Victor Isakov, 2013-06-29 This book describes the contemporary state of the theory and some numerical aspects of inverse problems in partial differential equations The topic is of substantial and growing interest for many scientists and engineers and accordingly to graduate students in these areas Mathematically these problems are relatively new and quite challenging due to the lack of conventional stability and to nonlinearity and nonconvexity Applications include recovery of inclusions from anomalies of their gravitational fields reconstruction of the interior of the human body from exterior electrical ultrasonic and magnetic measurements recovery of interior structural parameters of detail of machines and of the underground from similar data non destructive evaluation and locating flying or navigated objects from their acoustic or electromagnetic fields

Currently there are hundreds of publications containing new and interesting results A purpose of the book is to collect and

present many of them in a readable and informative form Rigorous proofs are presented whenever they are relatively short and can be demonstrated by quite general mathematical techniques Also we prefer to present results that from our point of view contain fresh and promising ideas In some cases there is no complete mathematical theory so we give only available results We do not assume that a reader possesses an enormous mathematical technique In fact a moderate knowledge of partial differential equations of the Fourier transform and of basic functional analysis will suffice *Catron and Sierra*
