Gianni Marchesi,Nicolò Marchetti,2011-06-30 The corpus of Early Dynastic figurative monuments from ancient Mesopotamia is substantial For many years establishing the chronological sequence and development of these artifacts has been a complicated and problematic task In this volume first published in Italian in 2006 and here translated revised and updated Gianni Marchesi and Nicol Marchetti provide a complete relative chronology for these remarkable objects Having established the chronological sequence through an examination of the archaeological contexts of the excavated pieces and the analysis of their inscriptions the authors then consider the significance of the changes over time in the subject matter of figurative arts noting a gradual shift from a stage in which the entire officialdom of early polities was celebrated to a stage in which the figure of the king alone becomes the main and then almost the only object of celebration Near the end of the Early Dynastic period which was a time of continual political upheaval new iconographic details were introduced in order to characterize the royal figure and a distinctive royal iconography began to be developed Starting from these observations the authors proceed to investigate the ideology of early polities in Mesopotamia and the role and functions of the king Along with a new chronology of Early Dynastic rulers and an outline of Early Dynastic history discussions of significant monuments and inscriptions are offered In addition all known inscriptions on royal statues are edited and provided with detailed commentaries First published in 2006 as *La statuaria regale nella Mesopotamica Protodinastica* Rome Bardi Editore

material culture land use diet subsistence agriculture settlement patterns environment and residential and ritual architecture to present the first authoritative cultural sequence for the pre contact Society Islands She also addresses a long standing debate in historical anthropology by arguing that M ohi society had multiple tiers of chiefs and settlement hierarchies prior to European contact thus forming a complex chiefdom Integrating anthropology archaeology indigenous history and theory Kahn lays out a new model for interpreting complex chiefdoms that blends bottom up and top down perspectives on social change With special attention to inequality and environmental change Fenua and Fare uses collective action theory to develop a more nuanced political history of social change offering fresh insight on the lives and interactions of commoners land managers high chiefs and secondary chiefs Readers will come away with a new appreciation for how social inequality blooms and grows not just in the Society Islands but elsewhere in Polynesia and beyond
