Chen, 2015-10-01 This book is for anyone who owns or is thinking of owning a Vixen Star Book Ten telescope mount or its predecessor. A revolution in amateur astronomy has occurred in the past decade with the wide availability of high tech computer driven Go To telescopes. Vixen Optics is leading the way by offering the Star Book Ten system with its unique star map graphics software. The Star Book Ten is the latest version of computer telescope control using star map graphics as a user interface, first introduced in the original Star Book first offered in 2003. The increasingly complicated nature of this software means that learning to optimize this program is not straightforward and yet the resulting views when all features are correctly deployed can be phenomenal. After a short history of computerized Go To telescopes for the consumer amateur astronomer market, Chen offers a treasury of technical information. His advice, tips and solutions aid the user in getting the most out of the Star Book Ten system in observing sessions. *Star Ware* Philip S.
