The Vanishing American Corporation Gerald F. Davis,2016-05-02 It may be hard to believe in an era of Walmart Citizens United and the Koch brothers but corporations are on the decline The number of American companies listed on the stock market dropped by half between 1996 and 2012 In recent years we ve seen some of the most storied corporations go bankrupt General Motors Chrysler Eastman Kodak or disappear entirely Bethlehem Steel Lehman Brothers Borders Gerald Davis argues this is a root cause of the income inequality and social instability we face today Corporations were once an integral part of building the middle class He points out that in their heyday they offered millions of people lifetime employment a stable career path health insurance and retirement pensions They were like small private welfare states The businesses that are replacing them will not fill the same role For one thing they employ far fewer people the combined global workforces of Facebook Yelp Zynga LinkedIn Zillow Tableau Zulily and Box are smaller than the number of people who lost their jobs when Circuit City was liquidated in 2009 And in the sharing economy companies have no obligation to most of the people who work for them at the end of 2014 Uber

had over 160 000 driver partners in the United States but recognized only about 2 000 people as actual employees Davis tracks the rise of the large American corporation and the economic social and technological developments that have led to its decline The future could see either increasing economic polarization as careers turn into jobs and jobs turn into tasks or a more democratic economy built from the grass roots It s up to us **Green Gadgets For Dummies** Joe Hutsko,2009-06-01 Save some green by going green with these environmentally friendly gadgets With concern for the future of our environment growing stronger and more serious every day there has never been a better time to take a new approach to some of the most popular gizmos and gadgets on the market and learn how you can convernt to electronics that have minimal environmental impact Green gadgets encompass everything from iPods to energy efficient home entertainment devices to solar laptop chargers and crank powered gizmos This helpful resource explains how to research green gadgets make a smart purchasing decision use products you already own in a more environmentally friendly way and say goodbye to electronics that zap both energy and money Explore the environmental and financial benefits of green gadgets with this friendly reference Discusses which gadgets save energy and which ones create energy Learn ways to offset your carbon footprint when you can t reduce consumption Get tips for understanding products labels and avoiding greenwash Discover how to calculate the energy and money your gadgets consume Get moving and start living green with this informative guide to environmentally and wallet friendly gadgets Note CD ROM DVD and other supplementary materials are not included as part of eBook file *The Perfect Vision* ,2006 **Bloomberg Businessweek** ,2011 *Business Week* ,2007 Reclaiming the Sacred ,1997
