Information Technology Security and Risk Management Stephen C. Wingreen, Amelia Samandari, 2024-05-16 Information Technology Security and Risk Management Inductive Cases for Information Security is a compilation of cases that examine recent developments and issues that are relevant to IT security managers risk assessment and management and the broader topic of IT security in the 21st century As the title indicates the cases are written and analyzed inductively which is to say that the authors allowed the cases to speak for themselves and lead where they would rather than approach the cases with presuppositions or assumptions regarding what the case should be about In other words the authors were given broad discretion to interpret a case in the most interesting and relevant manner possible any given case may be about many things depending on the perspective adopted by the reader and many different lessons may be learned The inductive approach of these cases reflects the design philosophy of the advanced IT Security and Risk Management course we teach on the topic here at the University of Canterbury where all discussions begin with the analysis of a specific case of interest and follow the most interesting and salient aspects of the case in evidence In our course the presentation analysis and discussion of a case are followed by a brief lecture to address the conceptual theoretical and scholarly dimensions arising from the case The inductive approach to teaching and learning also comes with a huge advantage the students seem to love it and often express their appreciation for a fresh and engaging approach to learning the sometimes highly technical content of an IT security course As instructors we are also grateful for the break in the typical scripted chalk and talk of a university lecture afforded

by the spontaneity of the inductive approach We were motivated to prepare this text because there seems to be no other book of cases dedicated to the topic of IT security and risk management and because of our own success and satisfaction with inductive teaching and learning We believe this book would be useful either for an inductive case based course like our own or as a body of cases to be discussed in a more traditional course with a deductive approach There are abstracts and keywords for each case which would help instructors select cases for discussions on specific topics and PowerPoint slides are available as a guide for discussion about a given case **Experience Skype to the Max** James Courtney,2015-03-18

Experience Skype to the Max shows you how to make the most of Skype s full range of features on any device Discover tips and tricks for saving time saving money and fostering better communication at work or in your personal projects Go beyond simple voice calling and discover Skype as a multimedia cross platform collaboration tool wherever you are in the world Learn how to connect to Skype from your devices whether in the home office on the road roaming on your mobile or over Wi Fi Discover the best ways to call or message landlines and mobile phones at minimum cost and how to manage your account and payments depending on your needs As a regular Skype user you ll also benefit from insider tips on choosing hardware and peripherals integrating your Skype usage with other platforms such as Office and Outlook com and preparing for the next developments in internet based communications As work and home lives become increasingly intertwined this book is your essential guide to building and sustaining your important relationships on one reliable platform Media Law and Ethics Roy L. Moore,Michael D. Murray,2025-04-02 This fully revised seventh edition provides a thorough introduction to both the legal and ethical considerations relevant to students pursuing careers in media law and communication This comprehensive textbook integrates fundamental legal and ethical principles with cases and examples from both landmark moments and recent history It incorporates discussion of new technologies and media throughout its coverage of core topics such as intellectual property defamation and commercial speech This edition introduces readers to media law in comparative international communication and explores topics such as data mining artificial intelligence and the dark web Coverage of recent court cases and congressional hearings bring readers up to date on the evolving discussion surrounding Facebook X formerly Twitter TikTok and today s other major online sources This hybrid textbook is ideal for undergraduate and graduate courses in media and communication that combine law and ethics Online resources including sample syllabi and a test bank are available at www.routledge.com 9781032612928 Principles of Pricing Rakesh V. Vohra,Lakshman

Krishnamurthi,2012-03-05 Pricing drives three of the most important elements of firm success revenue and profits customer behavior and firm image This book provides an introduction to the basic principles for thinking clearly about pricing Unlike other marketing books on pricing the authors use a more analytic approach and relate ideas to the basic principles of microeconomics Rakesh Vohra and Lakshman Krishnamurthi also cover three areas in greater depth and provide more insight than may be gleaned from existing books 1 the use of auctions 2 price discrimination and 3 pricing in a competitive

environment The Age of Surveillance Capitalism Shoshana Zuboff, 2019-01-15 The challenges to humanity posed by the digital future the first detailed examination of the unprecedented form of power called surveillance capitalism and the quest by powerful corporations to predict and control our behavior In this masterwork of original thinking and research Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism The stakes could not be higher a global architecture of behavior modification threatens human nature in the twenty first century just as industrial capitalism disfigured the natural world in the twentieth Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector Vast wealth and power are accumulated in ominous new behavioral futures markets where predictions about our behavior are bought and sold and the production of goods and services is subordinated to a new means of behavioral modification The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture a Big Other operating in the interests of surveillance capital Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight Zuboff's comprehensive and moving analysis lays bare the threats to twenty first century society a controlled hive of total connection that seduces with promises of total certainty for maximum profit at the expense of democracy freedom and our human future With little resistance from law or society surveillance capitalism is on the verge of dominating the social order and shaping the digital future if we let it FCC Record United States.
