## **Uganda National Examination Board 2012:**

Advancing the Ugandan Economy Ezra Sabiti Suruma, 2014-04-30 Internal conflicts dictatorship and economic disintegration characterized the first twenty five years of Uganda's independence from British colonial rule which culminated in the reign of Idi Amin and a violent civil war The country has since achieved an astounding turnaround of stability and growth Advancing the Ugandan Economy is a first hand look at the remarkable policy changes that took place from 1986 to 2012 and their effect in contrast with the turbulent events after independence Ezra Suruma held several key positions in the Ugandan government during the nation's transition period including minister of finance His insightful recounting of those times demonstrates that African countries can achieve economic stability and sustain rapid growth when they meet at least two interdependent conditions establishing a stable and secure political framework and unleashing entrepreneurialism Suruma also highlights the strategic areas that still require fundamental reform if Uganda is to become a modern state and shares his vision for the future of his country Rarely in African history has so much positive political and economic transformation of a country been achieved in such a short time Suruma's account of the commitment determination vision and dexterity of the Ugandan government holds invaluable lessons in managing the still complex policy challenges facing the African continent

Mathematics Education in East Africa Anjum Halai, Geoff Tennant, 2016-03-08 This Open Access book is a valuable resource for policymakers and practitioners as it brings insights mainly from developing countries where relatively less research activity takes place It is also a valuable resource for courses in mathematics education in the teacher education colleges and departments of education in the sub Saharan Africa region In the increasingly global and technological world mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility Hence countries and development agencies in the broader sub Saharan Africa region are looking towards increasing access to relevant and high quality secondary education as a lever towards economic development Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform In the East Africa region also a number of initiatives have been taken at the national level in the respective countries to improve the quality of mathematics education This book provides an in depth comparative analysis of the developments and issues in mathematics education in Kenya Tanzania Rwanda and Uganda and advances our understanding of the state of secondary mathematics education in East Africa

## **Young**

**People Reading** Evelyn Arizpe, Gabrielle Cliff Hodges, 2018-03-19 The value of small scale qualitative research projects into young people's reading is often underestimated Yet these finely tuned studies with a precise focus and highly specialised approach can provide us with profound insights into the richness and variety of young people's reading practices Bringing together contributors from six continents this fascinating volume explores researchers' experiences of investigating the

reading habits preferences and practices of young people aged 12-21. Detailing a variety of empirical methodologies and research methods, its chapters also consider reading in an array of contexts in various languages and using diverse media. Key issues addressed in the book include the complexity of sociocultural similarities and differences in young people's reading in international contexts, multilingual, bilingual, and monolingual readers' experiences of reading, how young readers use a range of different print and digital media, how our understanding of the range of texts available to young readers and the different contexts of and purposes for reading can be enhanced through small-scale qualitative research. Providing in-depth discussion of contributors' research and findings and touching on many different contexts, text types, and media, this volume will support and inspire current and future researchers, lecturers, and teachers interested in young people's reading.

*Development economics: An aspect of development* Akampurira Abraham, 2014-02-01. Development economics entail all the aspects of the development process, especially meant for the developing countries to overcome the challenges that impede development. This can be through education, education and manpower development, restructuring market incentives, incorporating favorable social and political approaches, and practices among other factors. Human beings, however, need streamlined social and economic systems that are able to achieve development through major changes in social structures, national institutions, cultures, and attitudes, as well as eradication of poverty, reduction of income inequality, and acceleration of economic growth. The developing world needs a multi-disciplinary approach and ideas so as to come out of the economic backward situation. Micheal P. describes that because of heterogeneity of the developing world and the complexity of the development process, development economics must be eclectic, attempting to combine relevant concepts and theories from traditional economics analysis along with new models and broader multi-disciplinary approaches from historical and contemporarily development experience of Africa, Asia, and Latin America. Debraj Ray puts it that development economics studies economics of the developing world and has made excellent use of economic theory, econometrics, anthropology, sociology, political science, biology, and demography. It needs a lot more dimensional approach to understand it.

Each Trade Policy Review consists of three parts: a report by the government under review, a report written independently by the WTO Secretariat, and the concluding remarks by the chair of the Trade Policy Review Body. A highlights section provides an overview of key trade facts. 15 to 20 new review titles are published each year. The reviews consist of detailed chapters examining the trade policies and practices of the member and describing trade policy-making institutions and the macroeconomic situation. These chapters are preceded by the Secretariat's Summary Observations, which summarize the report and presents the Secretariat's perspective on the member's trade policies. The Secretariat report and the member's policy statement are published after the review meeting along with the minutes of the meeting and the text of
