UML by Example Ghinwa Jalloul, 2004-01-19 This is a step by step introduction to object oriented software development It is suitable for teaching and for self study by practising software engineers seeking to add rigour to their techniques Seven complete case studies are included along with several smaller examples derived from small software projects developed for and delivered to real users These examples make use of a bridge process which presents a systematic approach for developing analysis models and unfolding these incrementally and iteratively through to design models and implementation The process could be viewed as one example of unified software development and has the potential of being scalable to large software problems It also provides a model for organising deliverables obtained throughout different phases of the software life cycle These case studies provide a medium for experimental use and act as templates that can be tailored by readers to fit their specific needs and circumstances *Use Case Driven Object Modeling with UML Theory and Practice* Don

Rosenberg, Matt Stephens, 2008-06-28 *Use Case Driven Object Modeling with UML Theory and Practice* shows how to drive an object oriented software design from use case all the way through coding and testing based on the minimalist UML based ICONIX process In addition to a comprehensive explanation of the foundations of the approach the book makes extensive use of examples and provides exercises at the back of each chapter This book leads by example It demonstrates common analysis and design errors shows how to detect and fix them and suggests how to avoid making the same errors in the future The book also encourages you to examine its UML examples and to search for specific errors You ll get clues then later receive the answers during review sessions toward the end of the book **Applying Use Case Driven Object Modeling with UML** Doug Rosenberg, Kendall Scott, 2001 This is the fourth report on mothers and babies in NSW to combine the annual reports of the NSW Midwives Data Collection MDC the Neonatal Intensive Care Units Data Collection and the NSW Birth Defects Register Page 9 Knowledge Discovery, Knowledge Engineering and Knowledge Management Ana Fred, Jan
