Under A Different Sun

Virgil, Benjamin Hall Kennedy

Under A Different Sun:

Observing the Moon Peter Wlasuk, 2000 *Observing the Moon* is a definitive work written as a reference book for anyone seriously interested in the Moon and its geology. It is of course a perfect companion for practical observers. Detailed and extensively illustrated chapters catalog all the interesting lunar features visible in modest telescopes. They are preceded by a crash course in modern lunar geology based on the vast amount we have learned during and since the Apollo missions and are followed by chapters on photographic and CCD imaging drawing and lunar topography. A CD ROM accompanies this book and contains an atlas of lunar images and much more. The CD ROM requires a PC running Windows 3.1 or higher, a minimum of 16MB Windows 3.1, 64MB Windows 95, up to 1GB of memory and a 2x or faster CD ROM player. **One Sun: A Guide Into Solar**

Tara Cunningham, Duane Cunningham, 2024-04-07 *One Sun: A Guide Into Solar* is a straight to the point, no fluff manual for anyone striving to obtain the coveted NABCEP PV Associate credential. This guide was crafted with the in-class student in mind. It does not serve as a standalone photovoltaic or solar installation guide; rather, it strictly focuses on the PV Associate exam from the perspective of a novice student. Therefore, if you aspire to pass the PV Associate exam but have little to no knowledge of the solar industry, then this guide is tailored for you. Proceedings of the 2011 2nd International Congress on Computer Applications and Computational Science

Ford Lumban Gaol, Quang Vinh Nguyen, 2012-02-23 The latest inventions in computer technology influence most of human daily activities. In the near future, there is a tendency that all aspects of human life will be dependent on computer applications. In manufacturing, robotics and automation have become vital for high quality products. In education, the model of teaching and learning is focusing more on electronic media than traditional ones. Issues related to energy savings and environment are becoming critical. Computational Science should enhance the quality of human life, not only solve their problems. Computational Science should help humans to make wise decisions by presenting choices and their possible consequences. Computational Science should help us make sense of observations, understand natural language, plan and reason with extensive background knowledge. Intelligence with wisdom is perhaps an ultimate goal for human-oriented science. This book is a compilation of some recent research findings in computer application and computational science. This book provides state-of-the-art accounts in Computer Control and Robotics, Computers in Education and Learning Technologies, Computer Networks and Data Communications, Data Mining and Data Engineering, Energy and Power Systems, Intelligent Systems and Autonomous Agents, Internet and Web Systems, Scientific Computing and Modeling, Signal Image and
