by Government or organization due to a lack of identification ability In Nigeria some time this is what is obtainable in the social and physical environment In view of the above fact environmental laws have been put in place to regulate every activity on the environment to manage the risk involved in these process and stage of development in other to avoid an impending or a looming catastrophe According to the International Network for Environmental Compliance and Enforcement INECE the major environmental issues in Nigeria are drought and flooding air pollution deforestation loss of biodiversity freshwater availability degradation of soil and vegetation and widespread poverty Government and other organizations hope to provide protection and mitigation regarding pollution and other disasters before their impacts contaminate the African environment as well as the global environment Therefore chronicled in this write up is the appraisal of the role of Environmental Law in risk management
