Attachment Theory in Relationships Vincenzo Venezia,2023-05-24 How does the choice of one s partner take place Do you see the same patterns of behaviour emerge in yourself and in your relationships over and over again Do you make noble efforts to grow the relationship but find that it gets stuck in the same place for months or even years Or conversely do you find yourself running away as soon as the relationship turns into something deeper Whether we are aware of it or not our childhood experiences play a huge role in shaping the kind of person we become The relationships we had as children with our parents or whoever looked after us have a profound effect on how we react to certain situations in our lives and how we interact with the people around us As young children we instinctively respond to the kind of love and support offered by our parents or guardians Later in life when we become adults these patterns that come from early experiences become life scripts cognitive maps that are generalised and extended to others and in particular to those people with whom we will form emotional relationships as adults Like it or not attachment styles inevitably shape intimate relationships between people

Indeed dysfunctional or incorrect attachment patterns can lead us to make poor emotional choices or to enter dysfunctional and unstable relationships that may be characterised by violence oppression or submission Human relationships can give rise to the constant presence of a fear of abandonment associated with controlling behaviours a constant search for reassurance and emotional hyper vigilance sometimes going as far as emotional blackmail Such patterns quickly become subconscious The book is intended as a journey to rediscover ourselves and how we interact with others that starts from childhood through to adulthood This book is recommended if your relationship is characterised by Dissatisfaction and or high levels of conflict Interpersonal distance Obsession intrusiveness jealousy and distrust A strong desire for fusion and at the same time concern about rejection and abandonment Problems with intimacy and the inability to enjoy or thrive in sexual relationships A low level of emotional involvement Don t worry if you identify with all or any of these problems The patterns and beliefs we develop as children although often deeply ingrained in our psyche can be unlearned and replaced with positive beliefs and approaches that enable us to achieve personal balance and a satisfying life as a couple Unlike other more specialised books this one is deliberately written in a clear fluent language suitable even for those with no background in psychology Couples who ignore this may be forced to settle for bonds made up of silences misunderstandings distance and conflicts that protracted over time leading inexorably to a sad ending of the relationship itself Understanding and identifying attachment issues is one of the most satisfying and valuable things you can do for yourself You will open the door to a greater sense of self worth successful friendships strong family ties and pave the way for lasting and loving romantic relationships

Autism & ADHD - A Father's Perspective James Wand, 2024-04-04 They're fine once they're here no need to worry Advice from many educational professionals She doesn't look autistic A friend's

observation I don't think I could even score that low. A comment made by a professional in relation to a child's autism diagnosis. Just some of the many things that have been said to the parents of three amazing children: Mia, George, and Finley. Follow James on his journey as a father along with his wonderful wife Emily as they fight for the future of their neurodiverse children. From the early years of parenthood to the present day, we see their perspectives change as they take on new roles as parent carers. It's a journey that impacts their children themselves and the people immediately around them as they advocate in ways they didn't know were possible. From a challenging diagnosis, battles with the education system and school avoidance, through to struggling with a father's own mental health, we learn how, as parents and as a family, they start to process the past events, accept their different paths in life, and begin to find their tribe.
