4 The biggest problem that you might encounter on the first test is **time management**. You must learn how to begin getting the 100% story out of the first few paragraphs of a linked comprehension article and filling the other average 150% of the answer sheet. It is suggested that a time goal of 15 min. is for the first two questions. After you become more comfortable with the story and with a time goal of 10 min., there are again 10 minutes that you must use for the second set. On average, you should be able to finish the test in 45 min. This gives you 15 minutes for the first set of questions, a 10-minute break, and a 10-minute period for the second set of questions.

When using the `using` directive, it is recommended that you use it to refer to the service namespace as `Service` instead of `using Service; namespace Service { ... }`. This way, the service namespace is clearly visible in the code, and the `using` directive is not used to refer to the service namespace.
