Faster, Higher, Farther Jack Ewing, 2017-05-23. A rich history of a company whose cars for better and worse have touched millions of lives, a character study of a brilliant but deeply flawed leader and a case study in how a corporate culture can turn toxic. Bethany McLean, New York Times Book Review. *Faster Higher Farther* chronicles a corporate scandal that rivals those at Enron and Lehman Brothers, one that will cost Volkswagen more than 22 billion in fines and settlements. Through meticulous reporting, New York Times correspondent Jack Ewing documents why VW felt compelled to install defeat devices in diesel vehicles that unlawfully lowered CO2 levels during emissions testing and how the fraud was committed, covered up, and finally detected. *Faster Higher Farther* is a briskly written account of unrivaled corporate greed. After the Great Complacency Ewald Engelen, Ismail Ertürk, Julie Froud, Sukhdev Johal, Adam Leaver, Mick Moran, Adriana Nilsson, Karel Williams, 2011-09-29. What is the relationship between the financial system and politics? In a democratic system, what kind of control should elected governments have over the financial markets? What policies should be implemented to regulate them? What is the role played by different elites: financial, technocratic, and political in the operation and regulation of the financial system? And what role should citizens, investors, and savers play? These are some of the questions addressed in this challenging analysis of the particular features of the contemporary capitalist economy in Britain, the USA, and Western Europe. The authors argue that the causes of the financial crisis lay in the bricolage and innovation in financial markets, resulting in long chains and circuits of transactions and instruments that enabled bankers to earn fees but which did not sufficiently take into account system risk, uncertainty, and unintended consequences. In the wake of the crisis, the authors argue that social scientists, governments, and citizens need to re-engage with the political dimensions of financial markets. This book offers a controversial and accessible exploration of the disorders of our financial capitalism and its justifications. With an innovative emphasis on the economically undisclosed and the politically mystifying, it combines technical understanding of finance, cultural analysis, and a political account of interests and institutions.

When Growth Stalls Steve McKee, 2009-03-03
 One of the toughest lessons every business leader learns is how hard it is to generate sustained growth Stalled growth is the rule not the exception even for the best managed companies That s especially true in unpredictable economic environments such as the one we re experiencing today McKee has a unique understanding of what happens when growth stalls His firm commissioned a study of 700 companies that had at one time been among the nation s fastest growing businesses Developed in concert with Decision Analyst a leading national research and consulting firm the study probed areas as diverse as corporate structure competition branding finance and strategy The target respondent profile were CEOs owners principals presidents managing directors or chairmen of the board In depth follow up interviews yielded fascinating stories and personal comments from executives who had been living on the front lines of real life growth crises McKee presents compelling knowledge about how and why companies lose their way and offers practical advice about how they can rekindle growth When Growth Stalls demonstrates that sluggish growth is generally produced not by mismanagement or strategic blundering but by natural market forces and management dynamics that are often unrecognized and widespread The book presents seven characteristics that commonly correlate with stalled growth and what to do about them Some are external forces to which countless companies have fallen victim economic upheavals changing industry dynamics and increased competition What McKee points out however is how often they catch companies off guard More surprising are four subtle and highly destructive internal factors that conspire to keep companies down lack of consensus among the management team

loss of nerve loss of focus and marketing inconsistency McKee makes the case that regardless of what's going on outside of an enterprise it's what's inside that counts
