Tourism Pat 2014 Phase And 2 Memo

**Ignacio Herrera Anchustegui, Madeline
Taylor, Eduardo G Pereira, Eddy Wifa**

Tourism Pat 2014 Phase And 2 Memo:

Positive Tourism in Africa Mucha Mkono, 2019-03-20 *Positive Tourism in Africa* provides a crucial counter narrative to the prevailing colonial and reductionist perspective on Africa's tourism trajectory and future. It offers a uniquely optimistic outlook for tourism in Africa whilst acknowledging the many challenges that African countries continue to grapple with. By examining broad and localized empirical studies, conceptual frameworks, culturally centered paradigms, and innovative methodological approaches for African contexts, this book showcases the many facets of tourism in Africa that illustrate hope, resilience, growth, and survival. This volume explores themes such as community-based tourism, wildlife tourism, tourism governance, and leadership crisis recovery, regional integration, the role of indigenous knowledge, event tourism, and the impact of smart technologies. It acknowledges the challenges and opportunities for growth that exist in these various contexts and explores how tourism creates value for the spectrum of its participants. Including a wide selection of contributions from diverse authors, many of them African, this book offers an Afro-centric interpretation of tourism phenomena. It will be of great interest to students, researchers, and academics in the field of Tourism and African Studies, as well as Development Studies and Geography.

Offshore Energy Law Ignacio Herrera Anchustegui, Madeline Taylor, Eduardo G. Pereira, Eddy Wifa, 2025-05-29 This book examines the regulatory, environmental, financial, socio-legal, and safety aspects that shape offshore energy infrastructure projects and their operation. The marine environment holds vast resources to provide energy solutions for humankind. The sustainable development of such offshore energy resources is one of the most pressing challenges posed by the energy transition. Whereas offshore hydrocarbons have been explored and extracted for more than a century, the offshore renewable industry is rapidly expanding, with lawmakers increasingly looking to the oceans for significant energy development. Offshore spaces now amalgamate mature and emerging energy industries, creating a pressing need to identify synergies and regulatory challenges. However, and despite the pivotal role offshore energy is to play in the future, the interaction synergies and conflicts arising between these regulatory, socio-legal, environmental, and financial dimensions of offshore energy are often not discussed within the energy law scholarship. This book aims to fill this evident gap in existing energy law research, to distill critical legal lessons from traditional offshore energy sectors, to encourage best practice regulation of offshore energy, net-zero industries. *Offshore Energy Law* provides a functional analysis that covers the life cycle of offshore energy developments, including renewable and hydrocarbons, within the broader context of the energy crisis and energy transition debates. Written and edited by leading global offshore energy experts, the book brings together a global and sectoral comparative perspective to central offshore energy topics such as licensing, socio-legal challenges, and opportunities, safety, and ecological governance, and the use of marine, maritime, spatial planning.
