Golf Course Irrigation offers valuable insight on the design, installation, management, and maintenance of irrigation systems, the most important management tool used on today's golf courses. Without manufacturers' bias, this useful resource provides hands-on guidance to the highest quality irrigation systems, including specifications and applications of the best pump stations, controllers, sprinkler heads, nozzles, valves, sensors, and other components that make the difference in top quality irrigation systems. Typically regarded as significant users of water, golf courses are under increasing scrutiny by governmental and environmental groups, making it essential that the up-to-date information found here on such topics as water supply, plant irrigation requirements, application uniformity, and construction management be at the fingertips of every golf course professional.
