Diagrams of Power in Benjamin and Foucault Mark Laurence Jackson,2022-09-04 This book's overarching premise is that discussion and critique in the discourses of architecture and urbanism have their primary focus on engagements with form particularly in the sense of the question as to what planning and architecture signify with respect to the forms they take and how their meanings or content what is contained is considered in relation to form as container While significant critical work in these disciplines has been published over the past 20 years that engages pertinently with the writings of Walter Benjamin and Michel Foucault there has been no address to the coincidence in the work of Benjamin and Foucault of an architectural figure that is pivotal to each of their discussions of the emergence of modernity The arcade for Benjamin and the panoptic prison for Foucault have a parallel role In Foucault's terms panopticism is a diagram of power The parallel for Benjamin would be his understanding of constellation In more recent architectural writings the notion of the diagram has emerged as a key motif Yet and in as much as it supposedly relates to aspects of the work of Foucault along with Gilles Deleuze this notion of diagram amounts for the most part to a thinly veiled reinstatement of geometry as idea This book redresses the emphasis given to form within the cultural philosophy of modernity and particularly with respect to architecture and urbanism inflects on the agency of force that opens a reading of their productive capacities as technologies of power It is relevant to students and scholars in poststructuralist critical theory architecture and urban studies This is a book about Foucault and Benjamin and it is grounded in a deep knowledge of and reflection upon their works but it is also underpinned by an impressive erudition There are reflections on Hegel and Heidegger central to the author and Derrida along with Kierkegaard and others This leads to a rich and suggestive discussion in staging a spatial architectural political conversation between Foucault and Benjamin Anonymous Reviewer Mark Jackson's *Diagrams of Power in Benjamin and Foucault* The Recluse of Architecture juxtaposes and interrogates its two leading actors so as to draw from and through them a theory of architecture which is inseparable from its recluse In doing so it elaborates a series of complex connections with their various interlocutors and inspirations Hegel Heidegger Derrida the Kabbalah Agamben allegory Marx Deleuze Klossowski tragedy capitalism modernity and so on The list is long and impressive This is not only done with an extremely high degree of scholarship but is presented in a light lucid and very compelling manner in a voice both personal and authoritative The recluse is the figure of mimesis itself the appearance of a withdrawal always already a ruin This book not only contributes a highly astute reading of its philosophical objects but it enacts the ontology of the recluse through its own

unfolding simultaneously revealing and withholding the meaning of architecture as such so that we not only understand its meaning but feel the pulsing differential of the book's object as if it were alive within us Stephen Zepke Independent Researcher Vienna
