Committee on Energy and Natural Resources, 1985      **Nature and the Environment in Nineteenth-Century Ireland** Matthew Kelly, 2019-11-05 The environmental humanities are one of the most exciting and rapidly expanding areas of interdisciplinary study and this collection of essays is a pioneering attempt to apply these approaches to the study of nineteenth century Ireland By bringing together historians geographers and literary scholars the volume offers new and original insights into familiar topics      **Crisis System** Petter Naess, Leigh Price, 2016-06-17 This book throws light onto the nature and causes of three different but strongly interconnected crises in contemporary societies worldwide an economic crisis an ecological crisis and a normative moral and political crisis These crises are reflected in the profoundly inequitable distribution of wealth resources and life opportunities around the world If we follow the causal roots of these crises we are led back to an inherent dynamic in the capitalist economic system itself discursively expressed as neoclassical mainstream economics For instance by conflating human needs with market demand mainstream economics disregards the needs of those who do not have sufficient purchasing power as well as any needs that cannot be quantified or monetised in some way Mainstream economics also ignores the notion of natural limits Furthermore it seems that everything that is quantifiable is potentially for sale and this results in the substitution of nature indigenous cultural traditions and various life forms with commodities and human capital The latter is defined as the skills instrumental for continual economic growth Besides critiquing the academic discipline of economics this book also points to a number of dysfunctional and crisis prone structures and practices of substantive economic life It will be of interest to students and scholars working in philosophy economics and environmental studies      Catalog of Copyright Entries.
