New Subediting F W Hodgson,2013-04-03 New Subediting gives a detailed account of modern editing and production techniques Its aim is both to help the young subeditor and to spell out to the newcomer to newspaper journalism what happens between the writing of news stories and features and their appearance in the newspaper when it comes off the press In this age of technological change the quality of the subbing has never been more important to a successful newspaper The careful use of typography pictures graphics and compelling headlines and the skillful handling of text coupled with good page planning all help to give character style and readability This book examines and draws lessons from work in contemporary newspapers in editing and presentation it defines the varied techniques of copytasting of editing news stories and features of styles of headline writing and the use of typography to guide and draw the attention of the reader It takes into account developments in the use of English as a vehicle of mass communication in two important chapters on structure and word use and it shows how to get the best out of the electronic tools now available to subeditors It also reminds journalists that however advanced the tools a newspaper is only as good as the creative skills of those that write edit and put it together

Trade Union Powers Elísio Estanque,Hermes A. Costa,Dora Fonseca,Manuel Carvalho da Silva,2020-10-27 This book analyses trade unions capacities of resistance following the period of austerity and bailout crisis in Portugal 2011 2015 Considering the destructive impacts of those policies on the working class and their unions it explores three case studies in three productive sectors the metal sector Autoeuropa VW the telecommunications sector PT Telecom Altice and the transport sector TAP Air Portugal In order to gather empirical information the study uses qualitative methods such as in depth interviews and focus groups The book shows that social dumping brutal unemployment growth increasing poverty levels spreading precariousness wage cuts and labour rights suppression were some of the

consequences of this period on the working class and trade unions Drawing on the power resources theoretical approach it shows how trade unions were able to react and reinvent themselves in terms of certain forms of power while others imploded or were relegated to a marginal role

BOT-Models as Instrument for Strategic Competitive Advantages in the Automotive Industry Volker Birken, 2004-03-23 Inhaltsangabe Abstract Build Operate Transfer Models roughly mean that a construction company operates a new built facility on his own or by a company founded on its behalf for a limited time The orderer outsourced the production and pays for each manufactured unit Pay on Production instead of doing the whole investment for the new facility At the transfer step the orderer either starts with operating the facility on his own extends the contract with the facility deliverer respectively with the extra founded company or looks for a new partner for operating the facility In the middle 90 s first BOT projects had been realized in the automotive industry Only few car manufactures went this way and with different motivations but all of them expected advantages for their companies This dissertation will analyze different motivations that led to the decision to ask facility deliverers for offering BOT Models An investigation of the automotive environment will be done and based on these results a statement will be derived under which circumstances BOT projects can fulfill the expectations of their customers and if sustainable competitive advantages can be generated with this approach As BOT projects include outsourcing of own activities for a long period of time long term effects especially on industry attractiveness have to be considered too BOT projects are meant to generate a win win situation between OEMs and facility deliverers Hence it is necessary to understand advantages and disadvantages on both sides which will be done in a study of this paper As BOT projects can be realized for construction projects with different degrees of integration into production processes resulting consequences are different too Therefore investigations of this dissertation will be limited to BOT projects with a high degree of integration nevertheless examples of medium and low integrated facilities will be given as well
