

Working Better Together Consultation Report

Summary

The Policing and Crime Act 2017 makes provision for local assessments by PCCs as to the most effective governance model for their local Fire and Rescue Service, giving them the ability to present a local business case to the Home Secretary where they perceive that a change would generate improvements in economy, efficiency and effectiveness, or public safety.

In North Yorkshire, the PCC, Julia Mulligan, appointed PA Consulting to assess whether or not a different governance model would be beneficial, and if so which of the different governance options set out in the legislation would most effectively deliver these opportunities. Due to the history of collaboration in North Yorkshire, local stakeholders agree that the status quo is not sufficient and that a change to the current model of governance is required.

The 2017 Act amends the Fire and Rescue Services Act 2004 to enable PCCs to form part or all of the governance of their local fire and rescue service, either through sitting on the fire authority through the Representation Model (Policing and Crime Act 2017), or by replacing it through either the Governance Model or the Single Employer Model (Fire and Rescue Services Act 2004 as amended).

The 'Representation' Model

- PCC is represented on a FRA (or its equivalent) in their police area with full voting rights, subject to the consent of the FRA

The Governance Model

- PCCs take on responsibility for the fire and rescue service(s) in their area
- Individual services retain their operational independence, their chief officers and, their own staff

The Single Employer Model

- Fire functions are delegated to a single chief officer for policing and fire
- Services would remain distinct from fire services, albeit supported by increasingly integrated support services

After assessing the options, the PCC has decided that the Governance model is the best option for North Yorkshire and should be recommended to the Home Secretary.

As such a full public consultation was required to gather feedback from the public, local authorities, fire and police services and partners. The above three options were presented to the public for consideration as to which they preferred. There was no option for the status quo, as there was local agreement that this was not an option. The consultation launched on 17 July 2017 running for 10 weeks. The LBC was published along with consultation materials and videos via a dedicated website.

The consultation included an open survey, a representative survey, a staff survey and a series of public events across the county in each district, during which over 1400 people were engaged. Information leaflets were available in public libraries, police and fire stations and council buildings across the county, with the website providing the full details of the business case. Over 2500 people responded to the survey.

The consultation found that a majority of the public and workforce favoured a transfer of governance, with the preference being for the Governance model. Local Authorities preferred the Representation model.

OF PAPERS AND PROTESTS: HONG KONG RESPONDS TO OCCUPY CENTRAL VOLUME 1 Guy Breshears, 2016-02 When China issued its paper on how the next Chief Executive of Hong Kong would be selected they decided what they thought was best for Hong Kong since its return and incorporation into China However the reaction to China's decision was probably not expected nor were the events that followed With the protests the Hong Kong government had to react and when Occupy Central actually took place their reaction had to be stronger This book deals with the government reactions to the protests It shows various government public announcements of the events as they unfolded as they tried to find an end to the protests

Dynamics of Change in the European Union Daniel Naurin, Anne Rasmussen, 2013-09-13 Agreements concerning inter institutional rules in the treaties of the European Union often give rise to reactions and processes of adaptation within the EU institutions Recent literature on EU legislative politics has increasingly examined decision making within the EU institutions but has largely overlooked how these internal

processes react and adapt to changes in relations between the EU bodies To fill this gap the authors present a series of empirical studies that examine how shifts in inter institutional rules and procedures affect intra institutional politics They show that the resulting intrainstitutional adaptations may in turn both have distributive consequences and affect the efficiency of the initial inter institutional reforms In addition they provide some stepping stones for theory building on how treaty reforms affect organizational structure and decision making within the EU institutions by outlining a series of mediating variables that link these two types of change processes This book was originally published as a special issue of West European Politics
