Arithmetic Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children's love of games songs and movement he's proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It's no longer just their teacher's math It's their math America's children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That's acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don't You know that to be true if you've ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten

numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like 5 7 12 17 8 9 6 X 7 42 and 56 7 8 and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget *Year 4, Ages 7-9 Math, Reading, Writing Practice Workbook - Vol1, 3000 Questions* Teresa Marek, Andrew Marek, KewlActiveMinds TM Workbooks and Practice Worksheets are immersive self study tools that encourage and stimulate your child s mind while at the same time letting them have fun learning Each section is devoted to a specific task with a structured format to avoid distractions and short enough problems to hold attention Very easy to use and understand to teach your child with simple clear lessons and easy to follow exercises presented in an interactive way A fun and challenging approach to plant the seeds of eagerness to learn and to keep your child s mind sharp Use daily a page or two to keep your child engaged not taking too long so children don t get bored while building a child s capabilities and confidence The Books a great addition to regular learning routines and a good method for parents to cope with distance learning BENEFITS Through completing questions we hope to enhance your child s comprehension active use and development of REASONING PROBLEM SOLVING COMMUNICATION CONFIDENCE MOTIVATION EASY TO USE ADDITIONAL RESOURCES The books are designed to be easy to use with sequentially numbered Questions and Answer Keys at the end of each Part to allow you to flip back and forth quickly QR Codes for your smartphone take you to Parent Resources that provide additional support BONUS CONTENT 1 Success Tracking Sheets Recording sheets are included to help track a child s progress through the Book and for individual sections to show how they progress over time 2 Parts Quizzes Mixed question quizzes are included at the end of every Part to show how well your child has grasped the concepts throughout the material 3 Downloadable Resources You can use clear overlay sheets to preserve the practice worksheets and download additional Tracking Sheets as a means of cost effective use of learning resources
