The Morphophonological Development of the Classical Aramaic Verb Joseph L. Malone,2020-05-04 This book offers a diachronic and synchronic account of the verb morphology and phonology of Aramaic from its initial appearance early in the first millennium B C E until the second millennium C E Aramaic a subfamily of Semitic is closely related to Hebrew and the other Canaanite languages together the two subfamilies of Aramaic and Canaanite constitute the northwest branch of the Semitic phylum In this study Joseph L Malone focuses on thirteen dialects of Aramaic chosen from a candidate list of approximately twice that number The specific varieties of Aramaic examined here are chosen to provide an optimal chronological and geographical range In a similar vein the finite verb serves as the subject of this study based on the assumption that a thorough treatment of the verb will asymptotically involve most of the patterns and processes that hold for the grammar as a whole The tools of this study are drawn from standard generative linguistics though care is taken to explicate these in more traditional terms where it is deemed necessary This book is essential reading for linguists who study the Semitic language families and in particular those
