Sound Knowledge J. Q. Davies, Ellen Lockhart, 2017-01-30 What does it mean to hear scientifically What does it mean to see musically This volume uncovers a new side to the long nineteenth century in London a hidden history in which virtuosic musical entertainment and scientific discovery intersected in remarkable ways Sound Knowledge examines how scientific truth was accrued by means of visual and aural experience and in turn how musical knowledge was located in relation to empirical scientific practice James Q Davies and Ellen Lockhart gather work by leading scholars to explore a crucial sixty year period beginning with Charles Burney's ambitious General History of Music a four volume study of music around the globe and extending to the Great Exhibition of 1851 where musical instruments were assembled alongside the technologies of science and industry in the immense glass encased collections of the Crystal Palace Importantly as the contributions show both the power of science and the power of music relied on performance spectacle and experiment Ultimately this volume sets the stage for a new picture of modern disciplinarity shining light on an era before the division of aural and visual knowledge **Musical News** ,1897 *Journals of the Legislative Council* Tasmania. Collinson, 1927 This book is written primarily for foreign students and teachers of English That purpose governs the whole presentment and organization of the material and the type of explanation offered To my own fellow countrymen it may at the highest reckoning offer a means of bringing to the surface hidden memories of curious and amusing words Probably it brings them little that is new but it may stimulate them to seek out and regroup their own linguistic experiences In fifty years time the work might even claim the attention of the English philologist whom it will provide with a certain amount of dated material for his historical inductions For the present its mission is more humble and more practical The first idea that such a collection as the present might not be unwelcome lower to Professor Jespersen whose kindness in looking through the first draft and suggesting improvements I acknowledge with deep gratitude Mr Bradley and Mr Hutton both of the Liverpool University Library have unselfishly given me the benefit of their sharp eyes and wide reading a number of their proposed emendations and additions have been gratefully embodied My special thanks are due to Dr Hittmair of the University of Innsbruck whose encouragement and ungrudging help have throughout been of the greatest value to me Finally I feel I must express my gratitude to the firm of Teubner for its care in preparing my MS Elementary Lessons in Heat, Light & Sound Daniel Evan Jones, 1891 *Primitive Methodist* ,1897
