Chinese Language and Culture Education Chunyan Zhang, 2024-04-02 Against the background of the Australian government's strategic plan to promote Asian languages in schools this book is an innovative autoethnographic inquiry into what actually occurs in the implementation of a Chinese language and culture program in an Australian context Drawing on eight years of socio cultural and educational fieldwork in a primary school Chunyan Zhang examines complex fluid and heterogeneous daily teaching practices and the ways in which ideas of China are assembled presented and performed She asks the following questions What is China Where does Taiwan fit into the China depicted in a multicultural globalised classroom Can Chinese communism or Chairman Mao be avoided in teaching English speaking learners What kind of China is brought in here while what kind of China is being silenced and othered Through the partial connection between method assemblage and Daoist concepts Zhang develops a water like pedagogy in teaching She uses the knowledge flow model to examine the imbalanced knowledge flow within teacher student interactions From finding China as a hybrid assemblage to proposing China as method Zhang's investigation makes an important contribution to the sociology of Chinese language education This book is an essential and rich content resource for primary and secondary teacher education and research teacher candidates and educators in Chinese as a second language education

Beyond Babel Tom Clark, 2022-10-20 The contribution that scholarly organizations make to the study of languages and literatures is a service to the value of systematically learning and using meaning understanding that meaning operates in systems Constructively speaking these organizations support the teaching and research of our world's experts in grammar genre medium production reception exchange critique appreciation and so on More defensively they are bulwarks against systems of misinformation against the empowerment of misrepresentation and distrust between people The chapters in this volume range from the Old Testament to Facebook and from East Asia to West Africa via Australia the Americas and Europe The scholarly strength forged across that range speaks to similar strengths that so many scholarly organizations devoted to studies in languages and literatures have cultivated and maintained often in the face of government indifference or hostility towards the Humanities Beyond

Babel makes a powerful case for their potential
