Trimble SCS900 Site Controller Software

Trimble® SCS900 Site Controller Software is an easy-to-use field software that enables grade checkers, site engineers, site surveyors, supervisors, and farmers to do their jobs more efficiently. From initial site reconnaissance to finished as-built collection, SCS900 provides tools to collect and distribute site measurements, perform stake out tasks, manage multiple work orders and job sites, monitor progress, and repeat the results... all without the need for a constant internet.

Now any person on the construction site can be equipped with accurate positioning, digital designs, and the ability to stake, measure and record information. Optional Roading and Advanced Measurement Modules include additional time-saving features that are unique to those specific tasks.

Work Faster, with Fewer Errors

The software organizes job site information and facilitates instant decision making, while troubleshooting site problems and managing day-to-day operations. This structured approach to data management reduces errors and associated rework, and allows productivity and performance of field crews to be monitored and analyzed.

Advanced communications help realize significant savings by eliminating the time and cost of deleting data filed to and from the field. Intelligent wireless data sync functionality ensures that all crews and the data manager are using the latest information. Engineers can send design changes and work orders to field crews, who can transfer progress reports, on-site problems, and as-built data back to the office at the touch of a button. This connectivity reduces delays and increases the likelihood that projects finish on time and under budget.

The Right Tools for the Job

Trimble SCS900 is available on the Trimble line tablet and TSC3 controllers. It is easy to learn and can be paired with Trimble DG400 or total station equipment for site control, high accuracy site measurement, grade checking and stakeout operations.

Ideal for contractors in highways, site preparation, earthworks, landfill, waste disposal and mining.
