Hinckley tweaks its recipe for sport-touring

BY PAUL DEAN

**I**F YOU'VE BEEN HUNGERING FOR A NEW SPORT-TOURER, YOU MIGHT WANT TO CHILL FOR A few weeks. Sometime in September, Triumph here in the U.S. will release the new Sprint GT, a sport-tourer worth thoughtful consideration before you write a check or float a loan for another bike in that category. I spent four fabulous days on a GT playing cat-and-throat on the twisty roads of the Scottish Highlands and down into the British Midlands during the bike's global launch, and by the time I finally parked it at the front door of the Triumph factory in Hinckley, I had been thoroughly impressed with its power, handling and all-around versatility.

"We were quite pleased with the LT's performance," the Sprint GT, said Trevor Burton, Triumph's Product Coordinator. "It was one of the more popular and enduring models in our range, but we wanted to give it greater practicality and place more emphasis on the 'touring' aspect of sport-touring." So, rather than undertaking a complete redesign of the LT, Triumph instead made a number of substantial changes to the existing package. Those included a full

internally, the engine. These engine retains the same duty. 1000cc per engine it has been since the LT's previous makeover in 2009, but it's now claimed to have a more peak horsepower (115) and an additional 8 in.-lb. of torque (85) delivered 1,000 rpm lower in the rev range. Those increases are solely the result of improved engine management and ECU mapping, along with the benefit from an additional exhaust in a more efficient and more efficient, says Triumph's right-side low-side muffler.

For the most part, everything from the back of the 2.5-gallon gas tank, forward is new, while everything forward is largely the same. The front-end components are the design of the upper fairing and the use of headlights that are not reflective (except instead of the LT's projector bulb). Also, we've changed the conventional fork helps reduce front-end dive when braking, and ABS is now standard equipment.

There are big changes up back, however. The rear engine is still single-sided, but it's longer, extending the wheelbase from 57.4 to 60.7 inches to enhance stability. The seat works an all-new, reduced-adjustable shock that has a more spring preload adjuster easily turned by hand. The seat is now 2.7 pounds lighter than the LT's, and both come mount. Suspension: 40/42 dual-spring sport-touring rubber fork dampers (best stability) can hold 17 tons apiece and can contain any "XSL" full dual-helmets, 17 tons more

than the LT's, and are dual-caps to open, close, extend and retract. The bags are certified to safely carry a fully 33 pounds each, so the additional was completely redesigned to support the weight of fully loaded bags also whatever might be loaded in the standard equipment luggage rack.

All this adds up to a sport-tourer that is slightly heavier than the LT ("about 11 pounds more," says Burton) and gets a bit longer, but it handles just as well, if not better, thanks to improved suspension, tires and weight distribution.

Triumph's decision to launch the GT in the Highlands of Scotland was a wise move, allowing more journalists from all around the world to experience the bike's exceptional performance on some of Britain's most spectacular roads. The specially prepared Highlands are well stocked with long, twisty ribbon of grippy asphalt that makes race and around-craggy mountain kept green by plentiful animal precipitation. It's ideal sport-touring terrain in a land of personal quality pleasure.

It's also why it didn't take too long to appreciate the LT's superb, confidence-inspiring handling. Despite its increase in weight and length, the Sprint flexed into and out of corners with only light pressure on the grips, no matter if I was bombing into a triple-dip corner or squeezing around a super-tight hairpin. Once hooked over, the bike always remained lock-steady, whether at moderate lean angles or the extreme horizons (climbing permitted) by its generous centering clearance. Even when I had 30 or 25 pounds of gear in each bag, the GT stood through corners easily and willingly without the slightest hint of drama.

Once we rode out of Scotland and spent a little time on the smooth, low mountains of England, the Sprint revealed the other side of its dual personality, that of a bike capable of cruising the open road with ease. The length wheelbase
