Interactive Learning David G. Brown, 2000 Interactive Learning is a rich collection of best practices in the use of instructional technology from 36 of America's most wired campuses. In 93 brief informal and practical vignettes, professors show how they transformed courses with technology, discuss how the technology affected teaching and learning, and distill important lessons learned. Life: The Science of Biology: Volume II William K. Purves, Gordon H. Orians, David Sadava, H. Craig Heller, 2003-12-08 This is an authoritative introductory text that presents biological concepts through the research that revealed them. Life covers the full range of topics with an integrated experimental focus that flows naturally from the narrative. *Life* William K. Purves, 2004 New edition of a text presenting underlying concepts and showing their relevance to medical, agricultural, and environmental issues. Seven chapters discuss the cell, information and heredity, evolutionary process, the evolution of diversity, the biology of flowering plants and of animals, and ecology and biogeography. Topics are linked by themes such as evolution, the experimental foundations of knowledge, the flow of energy in the living world, the application and influence of molecular techniques, and human health considerations. Includes a CD-ROM which covers some of the subject matter and introduces and illustrates 1,700 plus key terms and concepts. Each feature reinforces critical thinking and connects anatomy and physiology to the world of health care practice. This original text offers an exceptional student learning experience and
