Mind Is Flat Nick Chater, 2018-08-07 In a radical reinterpretation of how the mind works an eminent behavioral scientist reveals the illusion of mental depth Psychologists and neuroscientists struggle with how best to interpret human motivation and decision making The assumption is that below a mental surface of conscious awareness lies a deep and complex set of inner beliefs values and desires that govern our thoughts ideas and actions and that to know this depth is to know ourselves In this profoundly original book behavioral scientist Nick Chater contends just the opposite rather than being the plaything of unconscious currents the brain generates behaviors in the moment based entirely on our past experiences Engaging the reader with eye opening experiments and visual examples the author first demolishes our intuitive sense of how our mind

works then argues for a positive interpretation of the brain as a ceaseless and creative improviser Differential Equations
