Young Citizens and New Media Peter Dahlgren, 2013-10-11 This book integrates four distinct topics young people citizenship new media and learning processes When taken together these four topics merge to define an arena of social and research attention that has become compelling in recent years The general international concern expressed of declining democratic engagement and the role of citizenship today becomes all the more acute when it turns to younger people At the same time there is growing attention being paid to the potential of new media especially internet and mobile telephony to play a role in facilitating newer forms of political participation It is clear that many of the present manifestations of new politics in the extra parliamentary domain not only make sophisticated use of such media but are indeed highly dependent on them With an impressive array of contributors this book will appeal to those interested in a number of spheres including media and cultural studies political science pedagogy and sociology

Relocating Television Jostein Gripsrud, 2012-07-26 For over half a century television has been the most central medium in Western democracies the political social and cultural centrepiece of the public sphere Television has therefore rarely been studied in isolation from its socio cultural and political context there is always something important at stake when the forms and functions of television are on the agenda The digitisation of television concerns the production contents distribution and reception of the medium

but also its position in the overall largely digitised media system and public sphere where the internet plays a decisive role. The articles in this comprehensive collection are written by some of the world's most prominent scholars in the field of media communication and cultural studies including critical film and television studies. *Relocating Television* offers readers an insight into studying television alongside the internet, participatory media and other technocultural phenomena such as DVDs, user-generated content and everyday digital media production. It also focuses on more specific programmes and phenomena including *The Wire*, MSN amateur footage in TV news, Bollywoodization of TV news, YouTube fan sites tied to e.g. *Grey's Anatomy* and *X Factor*. *Relocating Television* will be highly beneficial to both students and academics across a wide range of undergraduate and postgraduate courses including media communication and cultural studies and television and film studies.

Cultural Journalism and Cultural Critique in the Media Nete Kristensen, Unni From, 2018-10-03 This book addresses a topic in journalism studies that has gained increasing scholarly attention since the mid 2000s: the coverage and evaluation of arts and culture or what we term cultural journalism and cultural critique. The book highlights three approaches to this emerging research field: 1. the constant challenge of demarcating what constitutes the cultural in cultural journalism and cultural critique and the interlinks of cultural journalism and cultural critique; 2. the dialectic of globalization's cultural homogenization and the specificity of local national cultures; and 3. the need to rethink perhaps even redefine cultural journalism and cultural critique in view of the digital media landscape. Cultural journalism is used as an umbrella term for media reporting and debating on culture including the arts, value, politics, popular culture, the culture industries and entertainment. Therefore, some of the contributions in this book apply a broad approach to the cultural when theorizing and analyzing the production and content of cultural journalism and the professional ideology, self-perception and legitimacy struggles of cultural journalists and editors. Other contributions demarcate their field of study more narrowly both topically and generically by engaging with very specific sub-areas such as film criticism or television series. This book was originally published as a special issue of *Journalism Practice*.

Understanding Media Culture Jostein Gripsrud, 2017-09-07 The mass media open our private lives to the world around us. They are central to economic, cultural and political processes through words, images and music. They address us in innumerable genres from advertising to news, journalism from soap operas to sports coverage from political debates to feature films and novels. This refreshingly different introduction to media studies offers an understanding of the mass media which is critical but which does not deny the pleasures they offer. Reflecting the trends of today's media and cultural studies

courses it introduces students both to social scientific approaches and those of the humanities and aesthetics The central debates of media and communication studies are presented starting from the individual s relation to the mass media and exploring questions of identity influence and social differences It then introduces the different methods used in analysing media texts and concludes with a discussion of the public sphere and democracy media technology institutions and production Each topic is presented in such a way as to encourage the reader to take part in discussions and further work Understanding Media Culture is written in an engaged and engaging way and offers an invitation to a deeper understanding for anyone interested in the field
