Excerpt from *Plane and Solid Analytic Geometry* This book has been prepared primarily for the use of the students in the Massachusetts Institute of Technology but it is hoped that it will be found adapted to the needs of other technical schools and colleges While the authors have restricted themselves to subject matter properly belonging to a first course they have nevertheless endeavored to give a complete and rigorous treatment of all questions discussed The memorizing of a mass of formulas has been discouraged the attention of the student being directed rather to the methods employed At the end of the book a collection of formulas has been made which it is believed is sufficient for all needs of the student In the Plane Geometry considerable space has been devoted to the general forms of the equations In particular the equation of the circle is treated in its most general form The conics have been approached from their general definition and the student is led to discuss the general equation of the second degree in which the xy term is missing and to find the equations of the tangent the normal and the polar for the equation of this form By this method of procedure much time is gained when the special equations of the parabola the ellipse and the hyperbola are discussed and it is believed that the students grasp of the subject is thereby strengthened About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Report on the Mathematics Attainment Test of June 1936** John Marshall Stalnaker, 1936 *Plane Analytic Geometry* Nels Johann Lennes, Archibald Shepard Merrill, 1929 **The Elements of Plane Analytic Geometry ...** George Russell Briggs, 1882 **Elements of Analytic Geometry** Simon Newcomb, 1885 *The Elements of Plane and Solid Analytic Geometry* Albert Luther Candy, 1904 *Analytic Geometry* E.
