

Step 1: Sample 1000 additional items to 10000

Step 2: Question: defined variables and set up a system of equations.

1. **Context:** In January, a newspaper (NP) reports of a certain percentage of students from a certain middle school who achieved in that achievement. After several weeks, another newspaper (NP2) reports that the same percentage of students from that middle school achieved in that achievement. (Both schools are in the same district.) During the reporting, students in that school took a paper, and it only got that high and many questions are missing. If those missing questions show exactly the same percentage?
- Question:** If the newspaper reports that 10% of the students achieved in that achievement?
- Variables:**
- = Percentage of students who achieved in that achievement
- = Percentage of students who achieved in that achievement
- System:**
- $$x + y = 10000$$
