Dear Customer,

We have gone to great lengths to provide the conditions for a long service life of your FAUN crane.

High-grade coatings, multi-layer paint systems and high-performance application procedures with a high process reliability characterize the excellent visual appearance of our FAUN cranes. Service and upkeep are indispensable to maintain this finish:

1. Paint takes some time to develop its maximum resistance. Thus, please do not clean your crane with excessively hot water, nor with excessive water pressure during the first 8 weeks. Avoid steam-jet units.
2. When using the crane on construction sites, when loading it with load take-up equipment and wooden planks, damage to the paint is inevitable. Such damage will result in corrosion or rust and must therefore be repaired in an expert fashion without delay.
3. Damage may also be caused by stone impact during travel. This also requires immediate action.
4. The paintwork is also vulnerable to weather conditions and thawing salt. Thus, regular cleaning of the crane and preservation of connectors, welds and screw couplings is necessary.

Customer satisfaction is our aim!
