Us Eoc State Exam Questions:

Trapped in Mediocrity Katherine Baird, 2012-08-09 Our students aren't learning we're falling behind other countries and many of our college graduates are even functionally illiterate We offer our kids a weak and poorly thought out curriculum too many teachers do not make good use of classroom time and follow lesson plans that are superficial and repetitive almost all state governments define proficiency at low levels of competency and because kids with very uneven skills populate a classroom teachers spend considerable time on review before introducing new material This dismal picture is tempered by the fact that the hard work and dedication of countless teachers and administrators means that many students get an excellent education But it doesn't temper it much As a group even our top students are not as strong as are those in a large majority of other rich countries But it doesn't have to be this way Katherine Baird an economist starts by clearly spelling out how our educational system is trapped in mediocrity Yet she doesn't just expose where we are She identifies the steps to get out of the trap We need to 1 dramatically reform our education's governance structure 2 establish high expectations for all students 3 provide adequate support to meet those expectations and 4 introduce strong incentives for students to work hard in school so they do their part in meeting higher standards Clearly it isn't as simple as it sounds but Baird carefully examines each factor that has led to the current state in education and then spells out how a combination of policies will weaken the forces that keep our schools mediocre and instead make them ones worth copying
