The Year Without Summer Tracing A D 536 And Its Aftermath:

The Years Without Summer Joel Gunn, 2000 Tree rings worldwide and other evidence record an almost catastrophic change in the environment during the middle years of the 6th century AD *Perilous Planet Earth* Trevor Palmer, 2003-06-12 A readable account of the history of natural disasters throughout history **Environment and Society in the Long Late Antiquity**, 2019-01-04 Environment and Society in the Long Late Antiquity brings together scientific archaeological and historical evidence on the interplay of social change and environmental phenomena at the end of Antiquity and the dawn of the Middle Ages covering the period ca 300 800 AD It gives a new impetus to the study of the environmental history of this crucial period of transition between two major epochs in premodern history The volume contains both systematic overviews of the previous scholarship and available data as well as a number of interdisciplinary case studies It covers a wide range of topics including the histories of landscape climate disease and earthquakes all intertwined with social cultural economic and political developments Contributors are Daniel Abel Schaad Francesca Alba Sanchez Flavio Anselmetti Jos Antonio Lopez S ez Daniel Ariztegui Brunhilda Brushulli Yolanda Carri n Marco Alexandra Chavarr a Petra Dark Carmen Fernandez Ochoa Martin Finn Asuunta Florenzano Ralph Fyfe Didier Galop Benjamin Graham John Haldon Kyle Harper Richard Hodges Adam Izdebski Katarina Kouli Inga Labuhn Tamara Lewit Anna Maria Mercuri Alessia Masi Lucas McMahon Lee Mordechai Mario Morell n Timothy Newfield Almudena Orejas Saco del Valle Leonor Pe a Chocarro Sebasti n P rez D az Eleonora Regattieri Stephen Rippon Neil Roberts Laura Sadori Abigail Sargent Gaia Sinopoli Paolo Squatriti Giovanni Stranieri Raymond van Dam Bernd Wagner Mark Whittow Penelope Wilson Jessie Woodbridge See inside the book **Surviving Sudden Environmental Change** Jago Cooper, Payson Sheets, 2012-02-01 Archaeologists have long encountered evidence of natural disasters through excavation and stratigraphy In Surviving Sudden Environmental Change case studies examine how eight different past human communities ranging from Arctic to equatorial regions from tropical rainforests to desert interiors and from deep prehistory to living memory faced and coped with such dangers Many disasters originate from a force of nature such as an earthquake cyclone tsunami volcanic eruption drought or flood But that is only half of the story decisions of people and their particular cultural lifeways are the rest Sociocultural factors are essential in understanding risk impact resilience reactions and recoveries from massive sudden environmental changes By using deep time perspectives provided by interdisciplinary approaches this book provides a rich temporal background to the human experience of environmental hazards and disasters In addition each chapter is followed by an abstract summarizing the important implications for today s management practices and providing recommendations for policy makers Publication supported in part by the National Science Foundation The Great Maya Droughts in Cultural Context Gyles Iannone, 2014-03-15 In The Great Maya Droughts in Cultural Context contributors reject the popularized link between societal collapse and drought in Maya civilization arguing that a series of periodic collapses including the infamous Terminal

Classic collapse AD 750 1050 were not caused solely by climate change related droughts but by a combination of other social political and environmental factors New and senior scholars of archaeology and environmental science explore the timing and intensity of droughts and provide a nuanced understanding of socio ecological dynamics with specific reference to what makes communities resilient or vulnerable when faced with environmental change Contributors recognize the existence of four droughts that correlate with periods of demographic and political decline and identify a variety of concurrent political and social issues They argue that these primary underlying factors were exacerbated by drought conditions and ultimately led to societal transitions that were by no means uniform across various sites and subregions They also deconstruct the concept of collapse itself although the line of Maya kings ended with the Terminal Classic collapse the Maya people and their civilization survived The Great Maya Droughts in Cultural Context offers new insights into the complicated series of events that impacted the decline of Maya civilization This significant contribution to our increasingly comprehensive understanding of ancient Maya culture will be of interest to students and scholars of archaeology anthropology geography and environmental studies

Negotiating the Past in the Past Norman Yoffee, 2022-08-16 Ralph Waldo Emerson once said that all history becomes subjective that in fact properly there is no history only biography Today Emerson s observation is hardly revolutionary for archaeologists it has become conventional wisdom that the present is a battleground where interpretations of the events and meanings of the past are constantly being disputed What were the major events Whose lives did these events impact and how Who were the key players What was their legacy We know all too well that the answers to these questions can vary considerably depending on what political social or personal agenda is driving the response Despite our keen eye for discerning historical spin doctors operating today it has been only in recent years that archaeologists have begun exploring in detail how the past was used in the past itself This volume of ten original works brings critical insight to this frequently overlooked dimension of earlier societies Drawing on the concepts of identity memory and landscape the contributors show how these points of entry can lead to substantially new accounts of how people understood their lives and why things changed as they did Chapters include the archaeologies of the eastern Mediterranean including Mesopotamia Iran Greece and Rome prehistoric Greece Achaemenid and Hellenistic Armenia Athens in the Roman period Nubia and Egypt medieval South India and northern Maya Quintana Roo The contributors show how and why in each society certain versions of the past were promoted while others were aggressively forgotten for the purpose of promoting innovation gaining political advantage or creating a new group identity Commentaries by leading scholars Lynn Meskell and Jack Davis blend with newer voices to create a unique set of essays that is diverse but interrelated

exceptionally researched and novel in its perspectives
