Themes For Summer Camp 2013:

Serious Fun at a Jewish Community Summer Camp Celia E. Rothenberg, 2016-07-01 Unique in the literature on Jewish camping this book provides an in depth study of a community based residential summer camp that serves Jewish children from primarily rural areas Focused on Camp Ben Frankel CBF established in 1950 in southern Illinois this book focuses on how a pluralist Jewish camp constructs meaningful experiences of Jewish family and Judaism for campers and teaches them about Israel Inspired by models of the earliest camps established for Jewish children in urban areas CBF s founders worked to create a camp that would appeal to the rural often isolated Jewish families in its catchment area Although seemingly on the periphery of American Jewish life CBF staff and campers are revealed to be deeply entwined with national developments in Jewish culture and practice and indeed contributors to shaping them This research highlights the importance of campers experiences of traditional elements of the Jewish family an experience increasingly limited to time at camp as well as the overarching importance of song Over the years Judaism becomes constructed as fun welcoming and easy for campers while Israel is presented in ways that are meant to be appropriate for a community camp In the camp s earliest decades Israel was framed by traditional Zionist discourse later as community priorities shifted the cause of Russian Jews was the focus Most recently as Israeli politics have been increasingly viewed as potentially divisive the camp has adopted an Israel lite approach focusing on Israel as the Biblical homeland of the Jewish people and a place home to Jews who are similar to American Jews In sum this study sheds light on how a small rural community camp contributes in significant ways to our understanding of American Jews their Judaism and their Zionism

Schools and Informal Learning in a Knowledge-Based World Javier Calvo de Mora, Kerry J. Kennedy, 2019-09-19 This book has two purposes To open up the debate on the role of informal education in schooling systems and to suggest the kind of school organizational environment that can best facilitate the recognition of informal learning Successive chapters explore what is often seen as a duality between informal and formal learning This duality is particularly so because education systems expend so much time and effort in certifying formal knowledge often expressed in school subjects reflecting academic disciplines Recognizing the contribution informal learning can make to young people s understanding and development does not negate the importance of valued social knowledge That complements it Students come to school with knowledge learnt from their families peers the community and both traditional

and social media They should not have to unlearn this in order to enter the world of formal learning Rather students different learning worlds should be integrated so that each informs the other In a knowledge based society all learning needs to be valued Some contributors to this book reflect on how new educational systems could be created in a move away from top down authoritarian and bureaucratic management Such open systems are seen to be more welcoming in acknowledging the importance of informal learning Others provide practical examples of how informal learning is currently recognized Some attention is also paid to the evaluation of informal learning A key objective of the work presented here is to stimulate debate about the role of informal learning in knowledge based societies and to stimulate thinking about the kind of reforms needed to create more open and more democratic school learning environments *Special issue on research* Colette

Family, Children, and Tourism in China Mimi Li, Xinran Lehto, 2021-12-14 This edited volume explores various issues in family tourism studies and complements the dramatic development of this market segment in China The book concentrates on family and children tourism and through its chapters hopes to enrich the landscape of family tourism in academia The family market in tourism has received increasing attention over past decades Yet academic endeavors in this area remain somewhat lacking in depth and scope In addition to imbalanced contributions from authors of diverse backgrounds the extant literature suffers from insufficient inclusion of children Relevant studies are largely limited to conventional tourism destinations such as beaches and cultural attractions In response to growing academic interest in family tourism this book is a compilation of eight chapters that attempt to push the scope and boundaries of existing research on family tourism The chapters in this book were originally published as a special issue of the Journal of China Tourism Research **Disney**

Channel Tween Programming Christopher E. Bell, 2020-08-28 Much has been written about the Walt Disney Company's productions but the focus has largely been on animation and feature film created by Disney. In this essay collection the attention is turned to The Disney Channel and the programs it presents for a largely tween audience. Since its emergence as a market category in the 1980s the tween demographic has commanded purchasing power and cultural influence and the impressionability and social development of the age group makes it an important range of people to study. Presenting both a groundbreaking view of The Disney Channel's programming by the numbers and a deep focus on many of the best known programs and characters of the 2000s shows like *The Wizards of Waverly Place*, *That's So Raven* and *Hannah Montana* this collection asks the simple questions: What does The Disney Channel Universe look and sound like? Who are the stories about? Who matters on The Disney Channel?

Flexible Authoritarianism Anna Schwenck, 2023-12-19 Flexible Authoritarianism challenges the idea that the transnational rise of authoritarianism is a backlash against economic globalization and neoliberal capitalism. Flexible authoritarianism, a form of government that simultaneously incentivizes a can-do spirit and suppresses dissent, reflects the resonance between authoritarian and neoliberal ideologies in today's comeback of strongman rule. The book conveys the look and feel of flexible authoritarianism in Russia through the eyes of up-and-coming youth. Drawing on field observations in depth interviews and analyses of documents and video clips, Anna Schwenck demonstrates how flexible authoritarianism is stabilized ideologically by the insignia of cool start-up capitalism and by familiar cultural forms such as the summer camp. It critically evaluates how loyalty to the regime, the order underlying political and economic life in a polity, is produced and contested among those young people who seek key positions in politics, business, the public sector, or creative industries.

Early Engineering Learning Lyn English, Tamara Moore, 2018-05-29 This book addresses engineering learning in early childhood spanning ages 3 to 8 years. It explores why engineering experiences are important in young children's overall development and how engineering is a core component of early STEM learning, including how engineering education links and supports children's existing experiences in science, mathematics, and design and technology both before school and in the early school years. Promoting STEM education across the school years is a key goal of many nations with the realization that building STEM skills required by societies takes time and needs to begin as early as possible. Despite calls from national and international organisations, the inclusion of engineering-based learning within elementary and primary school programs remains limited in many countries. Engineering experiences for young children in the pre-school or early school years has received almost no attention even though young children can be considered natural engineers. This book addresses this void by exposing what we know about engineering for young learners, including their capabilities for solving engineering-based problems and the few existing programs that are capitalising on their potential.
