Thinking In Time An Introduction To Henri Bergson:

Thinking in Time Suzanne Guerlac, 2017-03-15 Under the aegis of time Suzanne Guerlac displaces matter intuition memory and vitalism of the early twentieth century into the wake of poststructuralism and the dilemmas of nature and culture here and now This book is a landmark for anyone working in the currents of philosophy science and literature The force and vision of the work will enthuse and inspire every one of its readers Tom Conley Harvard University In recent years we have grown accustomed to philosophical language that is intensely self conscious and rhetorically thick often tragic in tone It is enlivening to read Bergson who exerts so little rhetorical pressure while exacting such a substantial effort of thought Bergson s texts teach the reader to let go of entrenched intellectual habits and to begin to think differently to think in time Too much and too little have been said about Bergson Too much because of the various appropriations of his thought Too little because the work itself has not been carefully studied in recent decades from *Thinking in Time* Henri Bergson 1859 1941 whose philosophical works emphasized motion time and change won the Nobel Prize for Literature in 1927 His work remains influential particularly in the realms of philosophy cultural studies and new media studies In *Thinking in Time* Suzanne Guerlac provides readers with the conceptual and contextual tools necessary for informed appreciation of Bergson s work Guerlac s straightforward philosophical expositions of two Bergson texts *Time and Free Will* 1888 and *Matter and Memory* 1896 focus on the notions of duration and memory concepts that are central to the philosopher s work *Thinking in Time* makes plain that it is well worth learning how to read Bergson effectively his era and our own share important concerns Bergson s insistence on the opposition between the automatic and the voluntary and his engagement with the notions of the living affect and embodiment are especially germane to discussions of electronic culture

Time, Temporality and Legal Judgment Tanzil Chowdhury, 2020-05-25 This book challenges the correspondence theory of judicial fact construction that legal rules resemble and subsume facts out there and instead provides an account of judicial fact construction through legally produced times or adjudicative temporalities that structure legal subject and event formation in legal judgement Drawing on Bergsonian and Gadamerian theories of time this book details how certain adjudicative temporalities can produce fully willed and autonomous subjects through time framed legal events in effect the paradigmatic liberal legal subject or how alternative adjudicative temporalities may structure legal subjects that are situated and constituted by social structures The consequences of this novel account of legal judgement are fourfold The first is that judicial fact construction is not exclusively determined by the legal rule s but by adjudication s production of temporalities The second is that the selection between different adjudicative temporalities is generally indeterminate though influenced by wider social structures As will be argued social structures framed as a particular type of

past produced by certain adjudicative temporalities may either be incorporated in the rendering of the legal event or elided. The third is that with the book's focus on criminal law, different deployments of adjudicative temporalities effect responsibility ascription. Finally, it is argued that the demystification of time as that which structures event and subject formation reveals another way in which to uncover the politics of legal judgement and the potential for its transformative potential through either its inclusion or its elision of social structures in adjudication's determination of facts. This book will be of interest to students and scholars in the field of legal judgement, legal theory and jurisprudence. **The Bergsonian**

Mind Mark Sinclair, Yaron Wolf, 2021-12-30. Henri Bergson (1859-1941) is widely regarded as one of the most original and important philosophers of the twentieth century. His work explored a rich panoply of subjects including time, memory, free will and humour, and we owe the popular term *lan vital* to a fundamental insight of Bergson's. His books provoked responses from some of the leading thinkers and philosophers of his time, including Albert Einstein, William James and Bertrand Russell, and he is acknowledged as a fundamental influence on Marcel Proust. *The Bergsonian Mind* is an outstanding, wide-ranging volume covering the major aspects of Bergson's thought from his early influences to his continued relevance and legacy. Thirty-six chapters by an international team of leading Bergson scholars are divided into five clear parts: Sources and Scene; Mind and World; Ethics and Politics; Reception; Bergson and Contemporary Thought. In these sections, fundamental topics are examined, including time, freedom and determinism, memory, perception, evolutionary theory, pragmatism and art. Bergson's impact beyond philosophy is also explored in chapters on Bergson and spiritualism, physics, biology, cinema and post-colonial thought. An indispensable resource for anyone in Philosophy studying and researching Bergson's work, *The Bergsonian Mind* will also interest those in related disciplines such as Literature, Religion, Sociology and French Studies. *Folds of Past, Present and Future* Sarah Van Ruyskensvelde, Geert Thyssen, Frederik Herman, Angelo Van Gorp, Pieter

Verstraete, 2021-09-07. This volume brings together important theoretical and methodological issues currently being debated in the field of history of education. The contributions shed insightful and critical light on the historiography of education on issues of decolonization, on the historical development of the educational sciences and on the potentiality attached to the use of new and challenging source material. *The Oxford Handbook of Process Philosophy and Organization Studies* Jenny

Helin, Tor Hernes, Daniel Hjorth, Robin Holt, 2014-05. This Handbook presents key ideas of philosophers and social theorists whose ideas inform process approaches to organization studies. Each chapter addresses the background and context of this thinker, their work with a focus on the processual elements and the potential contribution to organization and management research. *Subversive Property* Sarah Keenan, 2014-08-13. This book explores the relationship between space, subjectivity and property in order to invert conventional socio-legal understandings of property. Sarah Keenan demonstrates that new political possibilities for property may be unveiled by thinking about property in terms of space and belonging rather than exclusion. Drawing on feminist and critical race theory, this book shifts focus away from the propertied subject and on to the

broader spaces in and through which the propertied subject is located Using case studies such as analyses of compulsory leases under Australia's Northern Territory Intervention and lesbian asylum cases from a range of jurisdictions Keenan argues that these spaces consist of networks of relations that revolve around belonging not just belonging between subject and object as property is traditionally understood but also the less explored relation of belonging between the part and the whole This book therefore offers a conceptually useful way of analysing a wide range of socio legal issues It will be of relevance to those working in the area of property and legal geography but also to those with more general interests in socio legal studies social and political theory postcolonial studies critical race studies and gender and sexuality studies **The**

Tempo of Modernity Gabriel R. Ricci, 2017-09-08 The present work is a study in the history of an enduring idea that defines the inner life of the mind and also supplied a substratum for the twentieth century literary imagination and substance for philosophical thinking producing a unique alliance between philosophy and literature This special union was forged by a new holistic conception of time which supplemented and even supplanted the conventional sense of chronological time This temporal turn animated the existential insights of Husserl Heidegger and Bergson but it was grounded in nineteenth century advances in the biological sciences the hegemony of Hegelianism and even stretched back to Augustine's early meditation on time in Book XI of his Confessions In linking together a set of thinkers who addressed this form of temporal consciousness Gabriel R Ricci illuminates a common intellectual preoccupation from the vantage point of a concept The authors do not together assemble the thought it is the thought that produced a collective voice This voice appears in the episodes outlined in each chapter and they are framed by an introduction which explores Joseph Frank's insights into the new spatial forms in literature and an epilogue which resurrects J W Dunne's peculiar dream experiments and theory of precognition Ricci employs Frank's seminal essay to draw comparisons between literature's adaptation of the new time sense and philosophy's expression of the new compatibility between space and time Dunne's theory serves to demonstrate the continuity between literary form and philosophical speculation **Heidegger's Alternative History of Time** Emily Hughes, Marilyn

Stendera, 2024-04-02 This book reconstructs Heidegger's philosophy of time by reading his work with and against a series of key interlocutors that he nominates as being central to his own critical history of time In doing so it explains what makes time of such significance for Heidegger and argues that Heidegger can contribute to contemporary debates in the philosophy of time Time is a central concern for Heidegger yet his thinking on the subject is fragmented making it difficult to grasp its depth complexity and promise Heidegger traces out a history that focuses on the conceptualisations of time put forward by Aristotle Plotinus Augustine Kant Hegel Bergson and Husserl an alternative history of time that challenges how time has been defined and studied within both philosophy and the sciences This book explores what happens when we take seriously Heidegger's claim that these seven figures are essential to any understanding of time setting out what this can tell us about existence possibility and philosophy as a historical discipline Heidegger's Alternative History of Time will appeal to scholars

and advanced students working on Heidegger phenomenology the philosophy of time and the history of philosophy

Massey, 2015-02-23 The recent renewal of interest in the philosophy of Henri Bergson has increased both recognition of his influence on twentieth century philosophy and attention to his relationship to phenomenology Until now the question of Martin Heidegger's debt to Bergson has remained largely unanswered Heidegger's brief discussion of Bergson in Being and Time is geared toward explaining why he fails in his attempts to think more radically about time Despite this dismissal a close look at Heidegger's early works dealing with temporality reveals a sustained engagement with Bergson's thought In The Origin of Time Heath Massey evaluates Heidegger's critique of Bergson and examines how Bergson's efforts to rethink time in terms of duration anticipate Heidegger's own interpretation of temporality Massey demonstrates how Heidegger follows Bergson in seeking to uncover primordial time by disentangling temporality from spatiality how he associates Bergson with the tradition of philosophy that covers up this phenomenon and how he overlooks Bergson's ontological turn in Matter and Memory Through close readings of early major works by both thinkers Massey argues that Bergson is a much more radical thinker with respect to time than Heidegger allows [Derrida and the Time of the Political](#) Suzanne Guerlac, Pheng

David Bergelson's Strange New World Harriet Murav, 2021-12-22 A contemporary evaluation of Bergelson and his works examining Yiddish literature Jewish culture and modernism David Bergelson 1884-1952 emerged as a major literary figure who wrote in Yiddish before WWI He was one of the founders of the Kiev Kultur Lige and his work was at the center of the Yiddish speaking world of the time He was well known for creating characters who often felt the painful after effects of the past and the clumsiness of bodies stumbling through the actions of daily life as their familiar worlds crumbled around them

In this contemporary assessment of Bergelson and his fiction Harriet Murav focuses on untimeliness anachronism and warped temporality as an emotional sensory existential and historical background to Bergelson's work and world Murav grapples with the great modern theorists of time and memory especially Henri Bergson Sigmund Freud and Walter Benjamin to present Bergelson as an integral part of the philosophical and artistic experiments political and technological changes and cultural context of Russian and Yiddish modernism that marked his age As a comparative and interdisciplinary study of Yiddish literature and Jewish culture this work adds a new ethnic dimension to understandings of the turbulent birth of modernism Harriet Murav treats Bergelson with the care and sincerity that literary critics have shown other important writers This is a masterpiece of literary scholarship that will be sure to transform not only how people read Bergelson and who chooses to read Bergelson but how readers engage with the entire concept of modernism itself David Shneer author of *Yiddish and the Creation of Soviet Jewish Culture 1918-1930*
