shows you how to do it by utilizing the art of automatic thinking To Think Without Thinking To own something that has never been used is like not owning it at all MindWeb Way *Towards a Theory of Thinking* Britt Glatzeder, Vinod Goel, Albrecht Müller, 2010-03-20 What is Thinking Trying to Define an Equally Fascinating and Elusive Phenomenon Human thinking is probably the most complex phenomenon that evolution has come up with until now There exists a broad spectrum of definitions from subs ing almost all processes of cognition to limiting it to language based sometimes even only to formalizable reasoning processes We work with a medium sized definition according to which thinking encompasses all operations by which cog tive agents link mental content in order to gain new insights or perspectives Mental content is thus a prerequisite for and the substrate on which thinking operations are executed The largely unconscious acts of perceptual object stabilization ca gorization emotional evaluation and retrieving all the above from memory inscriptions are the processes by which mental content is generated and are therefore seen as prerequisites for thinking operations In terms of a differentia specifica the notion of thinking is seen as narrower than the notion of cognition and as wider than the notion of reasoning Thinking is thus seen as a subset of cognition processes and reasoning processes are seen as a subset of thinking Besides reasoning the notion of thinking includes also nonexplicit intuitive and associative processes of linking mental content According to this definition thinking is not dependant on language i e also many animals and certainly all mammals show early forms of thinking **Thinking About Thinking** Cassius J.
