from the scholarly article to the video game and online video clip and the connections and differences between mediated representations of the Black Death are considered The Black Death is one of the most well known aspects of the medieval world and this study of its associated memories and myths reveals the depth and complexity of interactions between the distant and recent past **Forty Signs of Rain** Kim Stanley Robinson,2005-07-26 The bestselling author of the classic Mars trilogy and The Years of Rice and Salt presents a riveting new trilogy of cutting edge science international politics and the real life ramifications of global warming as they are played out in our nation s capital and in the daily lives of those at the center of the action Hauntingly yet humorously realistic here is a novel of the near future that is inspired by scientific facts already making headlines When the Arctic ice pack was first measured in the 1950s it averaged thirty feet thick in midwinter By the end of the century it was down to fifteen One August the ice broke The next year the breakup started in July The third year it began in May That was last year It s a muggy summer in Washington D C as Senate environmental staffer Charlie Quibler and his scientist wife Anna work to call attention to the growing crisis of global warming But as these everyday heroes fight to align the awesome forces of nature with the extraordinary march of technology fate puts an unusual twist on their efforts one that will place them at the heart of an unavoidable storm **Sideways in Time** Glyn Morgan,C.
