Shareholder Value and the Common Good David Lutz, Paul Mimbi, 2005 What is the objective or purpose of business Management According to the dominant theory of contemporary financial management scholarship agency theory business managers are obligated to maximise owner or shareholder value According to most theories of business ethics however some owner value maximising actions should not be performed because they would be unethical Because business management scholars and business ethics scholars have not resolved this contradiction students of

commerce receive a contradictory education The twenty five essays in this interdisciplinary international volume address the question of the objective or purpose of business management from a wide range of theoretical perspectives Since some of the writers contradict one another it is not possible that all of them are correct Nevertheless the fact that many of them argue persuasively that business managers should aspire to more than maximisation of a financial variable challenges everyone with a theoretical or practical interest in commerce to reconsider acceptance of the owner value paradigm and to develop a richer conception of the profession of business management

European Corporate

Governance Thomas Clarke, Jean-Francois Chanlat, 2009-06-24 For decades Europe has sought to become more financially integrated with the United States and thus European legal institutions regulatory governance and accounting practices have faced pressures to adapt to international competitive markets Against this backdrop European corporate governance systems have been criticized as being less efficient than the Anglo American market based systems This textbook examines the unique dimensions and qualities of European corporate governance Reforms of key institutions the doctrine of shareholder value and the seemingly irresistible growth of CEO power and reward are critically analyzed The book brings out the richness of European corporate governance systems as well as highlighting historical weaknesses that will require further work for a sustainable corporate governance environment in the future In light of the most severe financial crisis since the 1930s this

intelligent look at European corporate governance is a vital textbook for courses on corporate governance and a great supplementary textbook on a host of business management and accounting classes

The Work of Communication
Timothy Kuhn, Karen L Ashcraft, Francois Cooren, 2017-07-06

The Work of Communication Relational Perspectives on Working and Organizing in Contemporary Capitalism revolves around a two part question What have work and organization become under contemporary capitalism and how should organization studies approach them Changes in the texture of capitalism heralded by social and organizational theorists alike increasingly focus attention on communication as both vital to the conduct of work and as imperative to organizational performance Yet most accounts of communication in organization studies fail to understand an alternate sense of the work of communication in the constitution of organizations work practices and economies This book responds to that lack by portraying communicative practices as opposed to individuals interests technologies structures organizations or institutions as the focal units of analysis in studies of the social and organizational problems occasioned by contemporary capitalism Rather than suggesting that there exists a canonically correct route communicative analyses must follow The Work of Communication Relational Perspectives on Working and Organizing in Contemporary Capitalism explores the value of transcending longstanding divides between symbolic and material factors in studies of working and organizing The recognition of dramatic shifts in technological economic and political forces along with deep interconnections among the myriad of factors shaping working and organizing sows doubts about whether organization studies is up to the vital task of addressing the social problems capitalism now creates Kuhn Ashcraft and Cooren argue that novel insights into those social problems are possible if we tell different stories about working and organizing To aid authors of those stories they develop a set of conceptual resources that they capture under the mantle of communicative relationality These resources allow analysts to profit from burgeoning interest in notions such as sociomateriality posthumanism performativity and affect It goes on to illustrate the benefits that investigations of work and organization can realize from communicative relationality by presenting case studies that analyze a the becoming of an idea from its inception to solidification b the emergence of what is taken to be the the product in high tech startup entrepreneurship and c the branding of work in this case academic writing and commercial aviation through affective economies Taken together the book portrays the work of communication as simultaneously about how work in the new economy revolves around communicative practice and about how communication serves as a mode of explanation with the potential to cultivate novel stories about working and organizing Aimed at academics researchers and policy makers this book s goal is to make tangible the contributions of communication for thinking about contemporary social and organizational problems

Corporate Law by Non Shareholder Constituencies Lessons for the Common Law World from South Africa advocates for a complementary enforcement regime for the current and proposed corporate legislative measures in the Anglo American corporate law Doing so would empower non shareholder interests in corporate decision making Mongalo argues that corporate legislative initiatives ought to provide for non shareholder constituencies considerations in decision making within corporate entities and that failure to enforce such frameworks reduces the law to lip service By offering a comprehensive critique of corporate constituency statutes and benefit corporation statutes in US and the enlightened shareholder value approach in the UK Mongalo makes the case that a shift from the current enforcement philosophy in Anglo American jurisdictions which is based on the preference of those to whom fiduciary duties are currently owed is necessary and that the Actionable Enlightened Shareholder Value AESVA with its origins in South Africa should be preferred
