Internationalisation of Social Sciences in Central and Eastern Europe Ilona Pálné Kovács,Dagmar Kutsar,2012-08-06 Internationalisation of Social Sciences in Central and Eastern Europe explores the way in which social sciences in comparison with other sciences in Europe have been divided by the political orders of West and East As part of the field of science policies in Europe this book contributes to the creation of a new understanding of the European academic landscape of social sciences with particular focus on CEE countries In its investigation of the emergence of social sciences in Central and Eastern Europe following the collapse of the totalitarian systems this book discusses how the internationalisation of the social sciences and the convergence between Western and Eastern social scientific life is hindered by factors including funding academic contacts and curriculum development The issues addressed within the text serve to prompt the realisation that coherence in European social sciences can be reached only if new academic traditions and cultures are developed and science policies harmonised This book is essential reading for undergraduate and graduate students of European Integration CEE or Transitional Studies and any courses related to science policies It is also relevant to science administrators and policy makers at national and European level

Towards European Science Linda Wedlin,Maria Nedeva,2015-12-18 Since the European Research Area was launched at the beginning of the century significant efforts have been made to realise the vision of a coherent space for science and research in Europe But how does one define such a space and measure its development This timely book analyses the dynamics of change in the policy and governance of science and research within Europe over the past decade It widens the scope of traditional policy analysis by focusing attention on the interaction between policy rationales new governance mechanisms and the organisational dynamics of the scientific field The contributors build a novel analytical framework to understand the European research space as one shifting from a fragmented space of Science in Europe to one that is labeled European Science The chapters explore the dynamics of this shift through the lenses of political science organisation theory science policy and related analytical traditions Towards European Science is an interdisciplinary book which will attract a wide set of scholars and professionals interested in science policy governance and scientific practice It will also be of use to university leaders and managers as well as policy makers and practitioners working on issues of internationalisation and the Europeanisation of science

The Great Transformation of Japanese Capitalism Sébastien Lechevalier, 2014-02-05 In the 1980s the performance of Japan s economy was an international success story and led many economists to suggest that the 1990s would be a Japanese decade Today however the dominant view is that Japan is inescapably on a downward slope Rather than focusing on the evolution of the performance of Japanese capitalism this book reflects on the changes that it has experienced over the past 30 years and presents a comprehensive analysis of the great transformation of Japanese capitalism from the heights of the 1980s through the lost decades of the 1990s and well into the 21st century This book posits an alternative analysis of the Japanese economic trajectory since the early 1980s and argues that whereas policies inspired by neo liberalism have been presented as a solution to the Japanese crisis these policies have in fact been one of the causes of the problems that Japan has faced over the past 30 years Crucially this book seeks to understand the institutional and organisational changes that have characterised Japanese capitalism since the 1980s and to highlight in comparative perspective with reference to the neo liberal moment the nature of the transformation of Japanese capitalism Indeed the arguments presented in this book go well beyond Japan itself and examine the diversity of capitalism notably in continental Europe which has experienced problems that in many ways are also comparable to those of Japan The Great Transformation of Japanese Capitalism will appeal to students and scholars of both Japanese politics and economics as well as those interested in comparative political economy

Measurement and Statistics on Science and Technology Benoît Godin, 2004-08-02 How do we objectively measure scientific activities What proportion of economic activities should a society devote to research and development How can

public sector and private sector research best be directed to achieve social goals Governments and researchers from industrial countries have been measuring science and technology for more than eighty years This book provides the first comprehensive account of the attempts to measure science and technology activities in Western countries and the successes and shortcomings of statistical systems Godin guides readers through the historical moments that led to the development of statistics on science and technology and also examines the socio political dynamics behind social measurement This enlightening account will be of interest to students and academics investigating science measurement as well as policy makers working in this burgeoning field *Universities and Strategic Knowledge Creation* Andrea Bonaccorsi, Cinzia Daraio, 2007-01-01 my opinion is that this book not only presents a wide and complete report of an extensive research effort but also opens new directions for future research advancements in this field that is very relevant both from theoretical considerations and policy making implications Education Economics This book is the first work that brings together comprehensive evidence on research and education activities conducted in European universities The volume is both timely current discussion on the European Research Area is based on very poor quality comparative evidence and important for scholars practitioners policymakers and students It provides a critical assessment of the availability and use of input/output data and indicators to measure and map European higher education systems At a time when universities are being asked to play an increasing number of roles this book represents a foundation on which scholars and policymakers can start to develop the harmonised statistical infrastructure needed to evaluate assess and support European universities in their changing roles Aldo Geuna University of Sussex UK Although the role of universities in the knowledge society is increasingly significant there remains a severe lack of systematic quantitative evidence at the micro level with virtually all policy discussion based on country level statistics or case studies This book redresses the balance by examining original data from universities in six European countries Italy Norway Portugal Spain Switzerland and the UK The authors provide micro based evidence on the evolution of the strategic profile of universities in terms of scientific research contract research education and the third mission The result is a highly innovative book that combines detailed national case studies and comparative institutional analyses with state of the art quantitative techniques Applying for the first time new generations of nonparametric efficiency measures on a large scale *Universities and Strategic Knowledge Creation* will be of great interest to researchers and postgraduate students in higher education economics of science and technology and innovation studies It will also appeal to policymakers and administrators in governments ministries and universities *Rethinking Innovation* Ram Subramanian, Martin Rahe, Vishnuprasad Nagadevara, C. Jayachandran, 2016-03-17 Innovation manifests itself as a key driver of improved productivity and sustainable growth in today's global economic landscape This book brings together perspectives and case studies from across the world discusses frameworks and actual conditions required for innovation and examines a variety of themes such as technology innovation research development team and human resource management

product and process creativity and entrepreneurship development to augment strategic and competitive advantage It will prove essential to those in business and management entrepreneurship economics and development studies particularly those interested in innovation strategic planning and business leadership *Public Management as Corporate Social Responsibility* Massimiliano Di Bitetto, Athanasios Chymis, Paolo D'Anselmi, 2014-11-05 This collection of case studies in public management bridges the gap between mainstream CSR confined to the for profit corporations and the vast bodies of workers and organizations that make up government and its public administration The variety and discretion of managerial endeavours in public management calls for accountability and responsibility of government beyond current legal instruments The book argues that CSR must be brought to bear with government In government in fact knowledge management is not a linear process but the result of working with passion of the parts implying discretionary behaviour and creativity which in turn imply choice and responsibility Cases ranging from the USA to Central America New Zealand and Europe all confirm the complex nature of public management entailing partnership synergy for disaster recovery the intertwined link between management and new technology and mindfulness at individual level The cases are set in a framework by theoretical essays on bureaucratic behaviour and unknown stakeholders Medical Technologies in Neurosurgery Christopher Nimsky, Rudolf Fahlbusch, 2007-12-03 This Acta Neurochirurgica supplement distills the accomplishments of the Joint Convention of the Academia Eurasiana Neurochirurgica and the German Academy of Neurosurgery held in Bamberg Germany from Sept 1 3 2005 The main focus is Medical Technologies for Neurosurgery including imaging image processing robotics workflow analysis and ethics Coverage extends from an overview of medical technologies to robotic assisted systems in neurosurgical operating rooms to intraoperative MRI Scientific Discourse and the Rhetoric of Globalization Carmen Pérez-Llantada, 2012-03-29 The rhetorical practices involved with the dissemination of scientific discourse are shifting Addressing these changes this book places the discourse of science in an increasingly multilingual and multicultural academic area It contests monolingual assumptions informing scientific discourse calling attention to emerging glocal discourses that make hybrids of the standard globalized and local academic English norms English clearly has a hegemonic role as the lingua franca of global academia this book conducts an intercultural rhetorical and textographic analysis to compare how Anglophone and non Anglophone academics utilise the standardized rhetorical conventions for scientific writing It takes an academic literacies approach providing a rhetorically and pedagogically informed discussion It enquires into the process of linguistic and rhetorical acculturation of both monolingual and multilingual scholars and in doing so redefines the contemporary rhetoric of science **Progress in Industrial Mathematics at ECMI 2004** Alessandro Di Bucchianico, Robert M.M. Rising to the Challenge National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Comparative National Innovation Policies: Best Practice for the 21st Century, 2012-08-06 America's

position as the source of much of the world's global innovation has been the foundation of its economic vitality and military power in the post war. No longer is U.S. pre-eminence assured as a place to turn laboratory discoveries into new commercial products, companies, industries and high paying jobs. As the pillars of the U.S. innovation system erode through wavering financial and policy support, the rest of the world is racing to improve its capacity to generate new technologies and products, attract and grow existing industries and build positions in the high technology industries of tomorrow. Rising to the Challenge: U.S. Innovation Policy for Global Economy emphasizes the importance of sustaining global leadership in the commercialization of innovation which is vital to America's security, its role as a world power and the welfare of its people. The second decade of the 21st century is witnessing the rise of a global competition that is based on innovative advantage. To this end, both advanced as well as emerging nations are developing and pursuing policies and programs that are in many cases less constrained by ideological limitations on the role of government and the concept of free market economics. The rapid transformation of the global innovation landscape presents tremendous challenges as well as important opportunities for the United States. This report argues that far more vigorous attention be paid to capturing the outputs of innovation, the commercial products, the industries and particularly high quality jobs to restore full employment. America's economic and national security future depends on our succeeding in this endeavor.

The Advanced Materials Revolution Sanford L. Moskowitz, 2014-05-19. A comprehensive treatment of the economic and global impacts of the advanced materials industry. This book represents the first comprehensive investigation of the emerging international advanced materials industry and its profound impact on the world's industrialized and newly emerging economies. It examines the ways in which science, technology, business and markets have converged to produce one of the most dynamic industries in recent years, one that is increasingly controlling global technological progress as a whole. From the unique vantage point of this crucial industry, this book illuminates the major differences in how the world's two economic superpowers, the United States and the European Union, perceive and carry forward the technology creation process and what these differences mean for achieving national and regional competitive advantage in the twenty-first century. It draws upon a rich body of source materials spanning from 1970 through 2007 as well as actual in-depth interviews and internal corporate and governmental documentation. The book is organized thematically with each section highlighting critical perspectives on the rise of the international advanced materials industry and its impact on the relative competitiveness of the United States and the European Union. It concludes with a discussion of how what we have learned about advanced materials in the West tells us of the future competitive power of an emerging Asia. The Advanced Materials Revolution is essential reading for researchers, executives and managers working in the advanced materials and related technological fields as well as professionals and scholars in the academic, investment, consulting and government communities. It also serves as a valuable case study textbook.
