through the early modern port Jew and court Jew to the grand financier of the nineteenth and twentieth centuries and contemporary investors Jews loom large in the economic imagination For capitalists and Marxists libertarians and radical reformers Jews are intertwined with the economy This association has become so natural that we often overlook the history behind the making and remaking of the complex cluster of perceptions about Jews and economy which emerged within different historical contexts to meet a variety of personal and societal anxieties and needs In *An Economy of Strangers* Avinoam Yuval Naeh historicizes this association by focusing on one specific time and place the financial revolution that England underwent from the late seventeenth century that coincided with the reestablishment of the Jewish population there for the first time in almost four hundred years European Christian societies had to that point shunned finance and constructed a normative system to avoid it relying on the figure of the Jew as a foil But as the economy modernized in the seventeenth century finance became the hinge of national power Finance's rise in England provoked intense national debates Could financial economy based on lending money on interest be accommodated within Christian state and society when it had previously been understood as a Jewish practice By projecting the modern economy and the Jewish community onto each other the Christian majority imbued them with interrelated meanings This braiding together of parallel developments Yuval Naeh argues reveals in a meaningful way how the contemporary and wide ranging association of Jews with the modern economy could be created
