Decker,2022-10-18 Explore the universe of Frank Herbert's Dune in all its philosophical richness He who controls the spice controls the universe Frank Herbert's

Dune saga is the epic story of Paul son of Duke Leto Atrides and heir to the massive fortune promised by the desert planet Arrakis and its vast reservoirs of a drug called spice. To control the spice Paul and his mother Jessica, a devotee of the pseudo religious Bene Gesserit order, must find their place in the culture of the desert dwelling Fremen of Arrakis. Paul must contend with both the devious rival House Harkonnen and the gargantuan desert sandworms, the source of the spice. The future of the Imperium depends upon one young man who will need to lead a new jihad to control the universe.

Dune and Philosophy recruits 23 philosophers to sift wisdom from Frank Herbert's Dune universe, including the first of an expected series of films following Paul Muad'Dib Atrides and his descendants, captivatingly brought to the big screen by Denis Villeneuve in 2021. Part of the New Wave of science fiction of the 60s and 70s, Dune is characterized by literary experimentation with shifting styles, differing narrative points of view, and with the psychedelic culture of the period. In Dune, the long-term strategies and intricate plots of warring Great Houses are driven not just by Heighliner spacecraft and lasguns, but also by mind-expanding drugs, psychic powers, dystopian themes, race memories, and martial arts, allowing control of the mind and the body. Substantial yet accessible chapters address philosophical questions including: Is it morally right to create a savior? Would interplanetary travel change human nature? What is the deeper meaning of desert ecologies? In conflict, how can you stay light years ahead of your opponents? Are there some drugs we would want to be addicted to? Does history repeat itself? Tens of thousands of years into an intergalactic future, can humans endure, or will we sacrifice what is most important in our humanity for power, glory, religion, and of course, the control of the spice? Dune and Philosophy sets an intellectual course through sand and stars to find out.

The Witcher and Philosophy Matthew Brake, Kevin S. Decker, 2024-11-05. Embark on a revealing philosophical journey through the universe of The Witcher. If I must choose between one evil and another, I'd rather not choose at all, growls the mutant witcher Geralt of Rivia. Andrzej Sapkowski's Witcher books lay bare the adventures of monster hunters like Geralt who seek to avoid humanity's conflicts and live only for the next kill and the coin that comes with it. But Geralt's destiny is complicated by his relationship with a powerful sorceress, Yennefer of Vengerberg. When he connects with a displaced princess, Ciri, Geralt lands right in the middle of the political conflicts of the Continent, which is endangered by Nilfgaard, a domineering southern kingdom that threatens to conquer the world.

Part of the Blackwell Philosophy and Pop Culture series, **The Witcher and Philosophy** brings on twenty-seven philosophers to test their mettle against werewolves, the bruxa, strigas, vodyanoi, and kikimora. Their work addresses the phenomenally popular books, three standalone Witcher video games, and the hit Netflix streaming show. These authors pass on their fascination with all manner of horror and sorcery, the mutations that make Geralt and others witchers, the commonalities between the Continent and post-apocalyptic settings, the intricacies of political power and scandal in the world of The Witcher, and reflections of our own world's changing views on race and gender that might offer hope or portend a grim future. Engaging and accessible, **The Witcher and Philosophy** considers key themes and questions such as: Who is human and who is a monster? Can Geralt afford to

stay neutral What kind of politics do sorceresses engage in How many universes converge on the Continent If we stare long enough into the abyss does it stare back into us Silver or steel Destiny is just the embodiment of the soul's desire to grow says Jaskier the bard proving himself to be a natural philosopher The tales of The Witcher remind us that our lives are a play written by both choice and destiny And it is your destiny to read and be inspired by The Witcher and Philosophy

Dialectics of the Big Bang and the Absolute Existence of the Multiverse Gregory Phipps, 2024-08-22 This interdisciplinary book develops a dialectical narrative about the beginning of the universe by combining Hegel's philosophy with texts about the Big Bang theory Scientific accounts of the Big Bang indicate that the first second of existence was an eventful period in which the universe progressed through six different epochs Bringing together cosmological narratives and Hegel's writings particularly The Science of Logic Gregory Phipps reads this movement as a dialectical progression He also draws upon Hegel's conception of absolutes to outline a model of the multiverse In doing so Phipps brings Hegel's philosophy into dialogue with contemporary science arguing that Hegelian readings of the first second offer speculative snapshots of a hypothetical multiverse that contains the full and probably infinite scope of existence For scholars and enthusiasts alike Dialectics of the Big Bang and the Absolute Existence of the Multiverse is a thought provoking exploration of the crosscurrents between philosophy science and narrative inviting readers to contemplate the profound mysteries of the cosmos **Black Panther**

Rediscovering the Two Quantum Dimensions, the 5th and the 4th dimension! J.E. Andersen, 2021-07-05 Late in 2016 the scientists with a little help from the big LHC the particle accelerator down in Cern finally concluded that there are no physical particles to be found inside this universe Meaning only energetic oscillating fields was to be found Can you even grasp that thought that everything in this universe is absolutely anything but being this postulated 3 dimensionally and fully physical universe that you thought you could understand and that you have been educated in Everything you believed this universe to be does not exist at all You don t find anything inside this universe that is only 3 dimensional and only fully physical And everything you did not believe in is the universe we actually live inside with only energetic oscillating fields We live inside a paranormal universe with 5 very active quantum physical dimensions It is actually these two quantum physical dimensions the 5th and the 4th that really runs the show We can only see discover and detect this universe inside the 3rd dimension and that dimension is the quantum physical screen of the universe This is where the Higg s field is operating with the funny universal stuff a stuff that can be there disappear and reappear again That leads us into the stealth technology and the physics behind the famous stealth plane

the new 5 dimensional quantum physics The only kind of believes and the only kind of education today lies inside this 3 dimensional and fully physical standardized big bang model and physics and all of that is a big lie That was the final conclusion from the big LHC down in Cern This very famous and shocking discovery actually proved my new 5 dimensional model by proving the energetic oscillating quantum physical atom that lies in a 5 dimensional spacetime My new 5 dimensional quantum physical model and totally new physics was theoretically fully proven already in 2012 Then the big process writing down all of this new philosophy and theory Out of that came the new 5 dimensional quantum physical physics Very different on any level This new model matches Einstein s extended relativity theory and can be understood as a Pier Review with Einstein s 5 dimensional model It explains the gravity the differentiated expansion explains the very big inflation and many more hidden secrets of the universe Read about the Author and the book and understand how this universe was created and how it functions
