CSR, Sustainability, and Leadership Gabriel Eweje, Ralph Bathurst, 2017-02-10 With the acceptance of CSR and Sustainability as important business performance indicators it is timely now to assess the impact that leadership has on the development of these processes. CSR Sustainability and Leadership seeks to explore the integration of these three elements through an examination of concerns and trends in contemporary organisations. The authors discuss empirical and theoretical studies which focus on processes and practices which inform the field. Organisations wish not only to participate in responsible behaviour but also actively lead within their local environments. However businesses are failing in their execution of CSR because of ineffective leadership. Business leaders are central to an organisation's purpose in the world and this book will inform a robust discussion about social issues which are pressing to scholars, policymakers, not-for-profit organisations and students.
