Deborah Leipziger, 2017-09-29 There is no single code or standard no panacea that will lead to corporate responsibility CR Yet now more than ever before corporations are waking up to the fact that they must adopt codes and implement standards to satisfy the growing demands of an ever wider and ever less trustful spectrum of stakeholders So where do companies start Information overload is nowhere more apparent than in the field of CR There are millions of pages and web pages written on codes and standards but most of it is spin organisations punting to sell their code or standard The reality is that CR is an emerging field a new terrain for which maps are much needed but often imprecise Each company is different each with its own challenges corporate culture unique set of stakeholders and management systems Corporate responsibility is a journey for which today there is no single map but a multitude of codes and standards that can be combined in new ways for different journeys In her many lectures around the world CSR consultant Deborah Leipziger has been asked the same question over and over again What are the best standards for companies seeking to be socially responsible Over the course of more than a decade she has analysed hundreds of codes of conduct and standards to answer that question This indispensable resource is the result The Corporate Responsibility Code Book is a guide for companies trying to understand the landscape of corporate responsibility and searching for their own unique route towards satisfying diverse stakeholders There is no one size fits all approach A company may face quite different challenges if it operates in more than part of the world And yet stakeholders especially consumers and investors are keen for some degree of comparability with which they can evaluate corporate performance There are countervailing forces at work within corporate responsibility on the one hand is the need for convergence in order to simplify the large numbers of codes and standards and on the other hand the need to foster diversity

and innovation Many of the best codes of conduct and standards are not well known while some CR instruments that are well disseminated are not terribly effective Some comprehensive codes of conduct achieve nothing while other quite vague codes of conduct become well embedded into the organisation and foster innovation and change The book explains some of the best CR instruments available and distils their most valuable elements The goal of the book is to help companies select develop and implement social and environmental codes of conduct It demonstrates how the world s leading companies are implementing global codes of conduct including the United Nations Global Compact the OECD Guidelines for Multinational Enterprises Social Accountability 8000 SA 8000 and AccountAbility 1000 AA 1000 The codes in this book cover a wide range of issues including human rights labour rights environmental management corruption and corporate governance The book also includes how to or process codes focusing on reporting stakeholder engagement and assurance This book is based on interviews with the standard setters the implementers of standards academics activists and other key stakeholders from around the world and in many cases includes the full text of the code profiled Each of the standards and codes described has been shared with the promulgators of the instrument to ensure that the information is as up to date as possible The Corporate Responsibility Code Book will be an invaluable tool for companies developing their own code but will also be a key tool for companies with a strong track record in CR seeking to understand the interrelationships among codes and standards to create their own corporate vision It will be the key reference text on corporate codes of conduct for many years to come
