Fabian Neuhaus, 2011-08-04 This book is very much about what the name urbanTick literally says about the ticking of the urban the urban as we experience it everyday on the bus in the park or between buildings It is about the big orchestrated mass migration of commuters the seasonal blossoms of the trees along the walkway and the frequency of the stamping rubbish eater trucks It is also not to forget about climate infrastructure opening hours term times parking meters time tables

growing shadows and moon light But most of all it is about how all this is experienced by citizens on a daily basis and how they navigate within this complex structure of patterns The content of this book is based on the content of the urbanTick blog between 2008-2010 One year blogging about this topic brought together a large collection of different aspects and thoughts It is not at all a conclusive view the opposite might be the case it is an exploratory work in progress while trying to capture as many facets of the topic as possible

Night Vision Troy Paiva, 2008-06-04 A booming subculture is on the rise dubbed Urban Exploration it involves sneaking into abandoned or off limits factories aviation boneyards decommissioned bases and other derelict features of the military industrial landscape Troy Paiva is a foremost photographer of the UrbEx as it is known to its devotees phenomenon and his distinctive blend of atmospheric night photos and lighting effects are the visual hallmarks of a scene that has drawn the increasing attention of the media and the public as seen in recent programs on both the Discovery Channel *Urban Explorers* and MTV *Fear Illuminated* by histories of the sites documented *Night Vision* reveals the remarkable discoveries of a new generation of explorers

Place Hacking Michael J. Rosen, 2015-01-01 Leaping from the Eiffel Tower in a wingsuit Scaling Shanghai Tower one of the world's tallest buildings Camping on the roof of Philadelphia's abandoned Eastern State Penitentiary These scenarios are real examples of explorations adventures and infiltrations of the built environment Thousands of people around the globe engage in the recreational activity of place hacking climbing wading jumping or even ironing their way into prohibited or obscure spaces Why do they do it Is it the exhilaration of trespassing Is it discovering a new perspective Is it roving through surroundings in an unpredictable manner Place hackers say it's all these things and more They're pushing the boundaries of exploration in much the same way that Neil Armstrong Jacques Cousteau and James Cook travelled into the frontiers of Earth and outer space Modern day place hackers investigate storm sewers subway tunnels abandoned power plants derelict hospitals deserted towns high security skyscrapers and temporary obsolete or even active spaces They go solo or in groups They plot their safety and success or intentionally throw caution to the wind They plan entrance and exit strategies and provision with gear or they just go for it without any planning For some the experience is about flying under the radar being in the moment For others it's about capturing stunning images and posting them on blogs and Instagram In *Place Hacking Venturing Off Limits* Michael J. Rosen takes readers across the globe to witness the challenging exploits of place hacking The journey includes a conversation with archaeologist Bradley L. Garrett a world renowned urban explorer as well as encounters with infiltrators builderers subway runners rooftoppers vertical campers drainers and human flies They're all participants in a world of investigation where whatever is standing can be turned on its head for a second look

DIY Utopia Amber Day, 2016-12-22 At first glance contemporary popular culture filled with bleak images of the future seems to have given up on the possibility of positive collective change Below the surface however alternative culture is rife with artist led projects activist movements and subcultural communities of interest that seek to spark the collective imagination and to encourage hunger for alternatives

More playfully self conscious than past utopian movements today's are often whimsical or ironic but are still entirely earnest Artists invite us to re author city maps or archive individual ideas for the future while maker collectives urge us to rethink our relationship to consumer goods All seem to have grown out of a similar do it yourself ethos and alternative culture One of the central conflicts informing these case studies is that while it remains immensely difficult to envision anything outside of the current system of consumer capitalism there is nevertheless a powerful desire to take it apart in piecemeal ways We see the longing for new social and political narratives new forms of communion and sociability and new imaginings of the possible longings that are currently unmet by mainstream culture but that are taking expression in myriad ways at the local level Taken as a whole this collection examines what our grand ideals and playful daydreams tell us about ourselves

Dwell, 2009-07 At Dwell we're staging a minor revolution We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines

A Burglar's Guide to the City Geoff Manaugh, 2016-04-05 A deeply researched and brilliantly written blueprint to the criminal possibilities in the world all around us Warren Ellis author of *Gun Machine* At the core of *A Burglar's Guide to the City* is an unexpected and thrilling insight how any building transforms when seen through the eyes of someone hoping to break into it Studying architecture the way a burglar would Geoff Manaugh takes readers through walls down elevator shafts into panic rooms and out across the rooftops of an unsuspecting city Encompassing nearly two thousand years of heists and break ins the book draws on the expertise of reformed bank robbers FBI special agents private security consultants the LAPD Air Support Division and architects past and present Whether discussing how to pick padlocks climb the walls of high rise apartments find gaps in a museum's surveillance routine or discuss home invasions in ancient Rome *A Burglar's Guide to the City* ensures readers will never enter a bank again without imagining how to loot the vault or walk down the street without planning the perfect getaway Praise for *A Burglar's Guide to the City* This burglar's guide isn't for ordinary smash and grab burglars it's for the rest of us who steal in steal out and get away with glorious dreams A spectacularly fun read Robert Krulwich cohost of Radiolab Who knew that urban studies could be so riveting Geoff Manaugh excels at finding new illicit and fresh angles on a subject as loved as it is overexposed the city In his new book elegant perverse sinuous supervillains maneuver and master the city like parkour champions I see the TV series already Paola Antonelli design curator MoMA

The Architect's Dream Sean Pickersgill, 2023-09-29 Sean Pickersgill demonstrates that the goal of creating meaningful architecture can take a variety of critical and philosophical paths The importance of architecture as an expression of broad complex social drivers is complemented by the equally popular idea that architecture as an intellectual pursuit retains its own autonomy as a self referential culture This book uniquely places the emphasis for innovation in architecture within the domain of critical thinking generally and a specific understanding of the semantics of

built form The book draws on a broad range of subject areas from film to philosophy to anthropology to mathematics and economics to show that the path to meaningful creative practice is always based in an understanding of the principal drivers for change and meaning in society It is not a simple recipe book or workshop manual for others to reproduce It requires the engaged reader to employ their own creative abilities to find what potential lies in each of the propositions and it will encourage the scholastic architect to continue to mine the rich veins of intellectual culture to demonstrate the latent purposiveness inherent in all meaningful architecture

The Dissertation Iain Borden, Katerina Ruedi Ray, 2014-05-09 The Dissertation is one of the most demanding yet potentially most stimulating components of an architectural course This classic text provides a complete guide to what to do how to do it when to do it and what the major pitfalls are This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation The book provides a plain guide through the whole process of starting writing preparing and submitting a dissertation with minimum stress and frustration The third edition has been revised throughout to bring the text completely up to date for a new generation of students Crucially five new and complete dissertations demonstrate and exemplify all the advice and issues raised in the main text These dissertations are on subjects from the UK USA Europe and Asia and offer remarkable insights into how to get it just right

Low End Theory Paul C. Jasen, 2017-08-24 Low End Theory probes the much mythologized field of bass and low frequency sound It begins in music but quickly moves far beyond following vibratory phenomena across time disciplines and disparate cultural spheres including hauntings laboratories organ workshops burial mounds sound art studios dancefloors infrasonic anomalies and a global mystery called The Hum Low End Theory asks what it is about bass that has fascinated us for so long and made it such a busy site of bio technological experimentation driving developments in science technology the arts and religious culture The guiding question is not so much what we make of bass but what it makes of us how does it undulate and unsettle how does it incite how does it draw bodily thought into new equations with itself and its surroundings Low End Theory is the first book to survey this sonorous terrain and devise a conceptual language proper to it With its focus on sound s structuring agency and the multi sensory aspects of sonic experience it stands to make a transformative contribution to the study of music and sound while pushing scholarship on affect materiality and the senses into fertile new territory Through energetic and creative prose Low End Theory works to put thought in touch with the vibratory encounter as no scholarly book has done before For more information visit <http://www.lowendtheorybook.com>

Dreams + Disillusions CJ Lim, Luke Angers, 2024-04-25 Dreams Disillusions explores the plethora of ideas and ideologies that have shaped and reshaped cities in profound ways However unlike a conventional title on the history of urbanism and architecture its research fluctuates between the world of concrete reality and the multiple universes that exist in lucid prose poetic visions and the outrageous imaginations of history s greatest and most in famous minds In their thoughts are the foundations for political trends and new civilisations alternative mappings and unlikely phenomena The six chapters reveal

dreams that were fundamental to the origin of great cities underpinning the stories of the many lives within and how through circumstance or manipulation fortunate coincidence or planned perfection desires are sometimes left defeated and disillusioned Myth and belief Tradition and logic Revolution and marginalisation Ignorance and hubris Sins and excess Seasons and climate Continuously interacting shifting to enlighten and to enrage these themes combine critical thinking with deep rooted influences and new agencies that are a true sign of the times The 18 illustrated speculations provide an abundance of curious imaginings diverse provocations and satirical criticism While there are distinctions between dreams and disillusionments could virtues be made of sins or sensitivity be borne from hubris Could progress advocate tradition or should we re attempt revolutions formerly experienced as disillusionments Whether by bold gestures or by subtle attrition cities are continually re written crucibles for the human condition In this book we develop a better understanding of the discourse of cities tailored to the determining factors of climate resources and humanity's idiosyncrasies to address a world in crisis

Speculative Everything Anthony Dunne, Fiona Raby, 2013-12-06 How to use design as a tool to create not only things but ideas to speculate about possible futures Today designers often focus on making technology easy to use sexy and consumable In Speculative Everything Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas For them design is a means of speculating about how things could be to imagine possible futures This is not the usual sort of predicting or forecasting spotting trends and extrapolating these kinds of predictions have been proven wrong again and again Instead Dunne and Raby pose what if questions that are intended to open debate and discussion about the kind of future people want and do not want Speculative Everything offers a tour through an emerging cultural landscape of design ideas ideals and approaches Dunne and Raby cite examples from their own design and teaching and from other projects from fine art design architecture cinema and photography They also draw on futurology political theory the philosophy of technology and literary fiction They show us for example ideas for a solar kitchen restaurant a flypaper robotic clock a menstruation machine a cloud seeding truck a phantom limb sensation recorder and devices for food foraging that use the tools of synthetic biology Dunne and Raby contend that if we speculate more about everything reality will become more malleable The ideas freed by speculative design increase the odds of achieving desirable

futures *City* P.D. Smith, 2012-06-19 For the first time in the history of the planet more than half the population 3.3 billion people are now living in cities Two hundred years ago only 3 per cent of the world's population were urbanites a figure that had remained fairly stable give or take the occasional plague for about 1000 years By 2030 60 per cent of us will be urban dwellers *City* is the ultimate handbook for the archetypal city and contains main sections on History Customs and Language Districts Transport Money Work Tourist Sites Shops and markets Nightlife etc and mini essays on anything and everything from Babel Tenochtitl n and Ellis Island to Beijing Mumbai and New York and from boulevards suburbs shanty towns and favelas to skylines urban legends and the sacred Drawing on a wide range of examples from cities across the world and throughout history it explores the reasons why people first built cities and why urban populations are growing larger every year *City* is illustrated throughout with a range of photographs maps and other illustrations **Underland** Robert Macfarlane, 2019-06-04 National Bestseller New York Times 100 Notable Books of the Year NPR Favorite Books of 2019 Guardian 100 Best Books of the 21st Century Kirkus Reviews Best Books of the 21st Century So Far Winner of the National Outdoor Book Award Mesmerizing *Underland* is a portal of light in dark times Terry Tempest Williams New York Times Book Review In *Underland* Robert Macfarlane delivers an epic exploration of the Earth's underworlds as they exist in myth literature memory and the land itself Traveling through the dizzying expanse of geologic time from prehistoric art in Norwegian sea caves to the blue depths of the Greenland ice cap to a deep sunk hiding place where nuclear waste will be stored for 100 000 years to come *Underland* takes us on an extraordinary journey into our relationship with darkness burial and what lies beneath the surface of both place and mind Global in its geography and written with great lyricism *Underland* speaks powerfully to our present moment At once ancient and urgent this is a book that will change the way you see the world Explorations in Urban Design Matthew Carmona, 2017-05-15 Whilst recognising that distinctly different traditions exist within the study and practice of urban design this book advances an interdisciplinary and innovative approach which is of direct importance to understanding the urban forms conditions practices and processes It enthuses and inspires users who are grappling with urban design research problems but who need inspiration to move from idea to methodological approach Through the work of 32 urban researchers from the arts sciences and social sciences it demonstrates a wide range of problems and approaches and shows how the diverse range of complementary approaches can come together to provide a holistic understanding to the design of cities While each of the contributors presents a particular approach to researching the field sometimes focusing centrally on particular research methodologies others cutting across methods or focusing on theory all include discussion of actual research projects to illustrate their application to real world problems This book will be valuable to everyone from the informed undergraduate student about to embark on their first dissertation to PhD students and seasoned researchers immersed in methodological and conceptual complexity and wishing to compare available and appropriate methodological paths *Bracket 2* Neeraj Bhatia, 2013-01-15 From soft politics soft power and soft spaces to
