This book is a very useful reference guide on how de jure and de facto standards are being developed and how these standards compete against each other. The book also looks at how FRAND commitments are being determined across countries, how these disputes have played out especially in Asia, and how they can be better dealt with in the future globally. The book gives a broad overview of the business model of dominant SEP patentees and analyzes some standards for FRAND licensing of SEPs which are converging in major Asian jurisdictions. It highlights the need for ex ante regulation in the FRAND licensing of SEPs and suggests how we can reconcile conflicts which may arise from different legal standards. This book provides detailed and comprehensive analysis of recent SEP cases with an emphasis on Asia and will interest anyone who wishes to have more insight into the legal policy, industrial and economic implications of such issues. Emerging Issues in Global Marketing James Agarwal, Terry Wu, 2018-03-28
This book examines emerging theories, frameworks and applications of global marketing for the 21st century. It highlights how global marketing is changing in a globalized and digital economy that is fast increasing in complexity and uncertainty. The traditional approach to global marketing is no longer sufficient to address the emerging issues in global markets. Global companies need to challenge traditional assumptions in global marketing in an era of shifting political, cultural, economic and technological changes. They need to take a fresh look at the contemporary threats and opportunities in markets, institutions and technology and how they affect entry and expansion strategies through careful recalibration of the marketing mix. This book offers new insights for global marketing that addresses these issues. This book should be an ideal resource to both academic scholars and reflective practitioners globally such as CEOs and chief marketing officers as well as government officials and policy makers interested in formulating strategies and policies for global marketing activities in the face of a globalized and digitized economy. This well-crafted research volume is an excellent addition to the growing literature on new trends in international marketing. The authors present the latest insight on the impact of phenomena such as cross-border e-commerce and digital markets and they discuss new tools for political risk assessment, international branding and more broadly the reconfiguring of marketing mix strategies. A powerful reminder that the new global market remains a rugged landscape. Alain Verbeke, McCaig Research Chair in Management and Editor in Chief, Journal of International Business Studies, University of Calgary, Canada.
