within that community Ultimately the quality of police training and the public s safety depend not only on the leadership of police executives as well as the quality of educational institutions and police candidates but also on the building of a community s trust in its police The issues of police recruitment education and retention have greater consequence in an era when protests and other signs of negativity surround law enforcement Several incidents including most notably George Floyd s murder by police have sparked new training initiatives regarding police de escalation and community engagement At the same time the proliferation of gun violence and a contentious political climate have led some officers to refrain from undertaking proactive types of policing In this context reform of the police education system is urgent This book examines police training at all levels of government local regional state and federal In addition citizen participation programs including the role of the media and programs for furthering law related education LRE are highlighted The proposed police education model recognizes that ordinary members of the American public need to contribute to the provision of basic police education for it is they who must both support and be served by their police The focus is on teaching a guardian style of policing at the local level Police education would combine higher education necessary practical proficiencies and intensive field experiences through a gradual level of greater responsibility likely extending over a 2 plus year period for trainees with less than a year of previous college credits This book will be of interest to a wide range of audiences such as law enforcement professionals and trainers including those in executive development programs in police departments community leaders scholars and policy experts who specialize in policing concerned citizens and students of criminal justice especially those interested in police organization and management criminal justice policy and the historical development of police

 Michaels,2025-06-24 The risk of closure and repression in schools In the last two decades education officials have closed a
 rising number of public schools nationwide related to low performance These schools are mainly located in neglected
 neighborhoods with high concentrations of poverty Despite this credible threat of closure relatively few individual schools
 threatened with closure for low performance in the United States are actually shut down Yet as Erin Michaels argues the
 looming threat is ever present Test Measure Punish critically shifts the focus from school shutdowns to the more typical
 situation within these strained public schools operating under persistent risk of closure Many K 12 schools today face
 escalating sanctions if they do not improve according to repressive state mandates which in turn incentivize schools to put
 into place nonstop test drills and strict student conduct rules Test Measure Punish traces how threats of school closure have
 distorted education to become more punitive which disproportionately impacts even targets Black and Latinx communities
 and substantially hurts student social development This book addresses how these new punitive schooling conditions for
 troubled schools reproduce racial inequalities Michaels centers her research in a suburban upstate New York high school
 serving mainly working class Black and Latinx students She reveals a new model of schooling based on testing and security
 regimes that expands the carceral state making the students feel dejected criminalized and suspicious of the system their
 peers and themselves Test Measure Punish offers a new theory of schooling inequality and shows in vivid detail why state led
 school reforms represent a new level of racialized citizenship in an already fragmented public education system **Project**
