

PADI Instructor Examination Written Final Exams Study Guidelines

Use the guidelines in this document to help you prepare for the following written Final Exams administered at all PADI Instructor Examinations (IEs):

- Skills And Environment
- Equipment
- Recreational Dive Planner
- Physiology
- Physics

1. Review academic diving information presented in the following PADI manuals and books. Be sure you've mastered the academic objectives in each of the diver manuals:
 - a. PADI *Open Water Diver Manual*
 - b. *Adventures in Diving*
 - c. PADI *Rescue Diver Manual*
 - d. PADI *DiveMaster Manual*
 - e. *The Encyclopedia of Recreational Diving*
 - f. *Diving Knowledge Workbook*
 - g. *The Wheel Instructions for Use Booklet*

If these books are not available (or they do not exist in your primary language), other diving texts with detailed, elaborated academic diving information may be used.

2. Complete the PADI quizzes and final exams for each of the following courses: Open Water Diver, Rescue Diver and DiveMaster. On these exams, be able to identify the correct answer for each question. If the question is multiple choice, you must also be able to explain why the other choices are incorrect.
3. Complete the PADI Instructor Preassessment Exam in the *Instructor Candidate Workbook*. Your performance on this exam is a general indicator of your knowledge of diving theory and information. Concentrate your study efforts in the areas of weakness indicated by the preassessment exam.

NOTE: As with any preassessment document, successful mastery does not ensure success with the actual IE exams. *At the IE you are expected to have a thorough (instructor-level) knowledge of critical diving information and concepts.*

4. Questions on all PADI exams are *criterion-referenced*, meaning they relate directly to one or more performance objectives. Because these performance objectives are the basis on which PADI materials are written, the correct responses to all questions can be found within PADI materials.

The following list of objectives were used to construct the IE written Final Exams. As a result, a thorough understanding of these objectives provide you with a solid foundation of knowledge for taking the exams. You must do more, however, than simply memorize responses to the objectives — you must be able to solve *never-before-encountered problems and identify specific applications* of the concepts involved.

The objectives are listed according to exam topic. Page references are noted in brackets. Unless otherwise noted, these page references are for *The Encyclopedia of Recreational Diving*. The pages indicate where you may find material dealing with the objective in question.

NOTE: Although *The Encyclopedia of Recreational Diving* is a convenient assembly of academic diving knowledge, information on each objective can be obtained from other diving manuals and texts in various languages.

A. Skills And Environment

A PADI Instructor must be able to:

1. State the maximum altitude above which special procedures are required for the use of most dive tables, and explain why diving at altitude requires special consideration. [2-28] (Also see p. 226 of the PADI *Open Water Diver Manual*.)
2. Explain how tides are caused and why diving conditions are usually best at slack tide. [4-13 to 4-15] (Also see p. 140 of the PADI *Open Water Diver Manual*.)
3. Define the term *environmental orientation*, explain for whom such an orientation is intended and state which PADI Experience program offers an orientation. [PADI *Open Water Diver Manual* pp. 249-250]
4. Explain the proper procedure for executing a Controlled Emergency Swimming Ascent. [PADI *Open Water Diver Manual* pp. 165-166]
5. Define the term *neutral buoyancy* and describe how to execute a buoyancy check at the surface. [PADI *Open Water Diver Manual* p. 65, 115-116]
6. Demonstrate the thirteen PADI Standard Hand Signals and explain the meaning of each. [PADI *Open Water Diver Manual* pp. 101-104]
7. Explain what action should be taken with a victim of a near-drowning accident. [2-11] (Also see PADI *Rescue Diver Manual* pp. 60-61.)
8. List at least three common signs/symptoms of marine life injuries. [4-69] (Also see PADI *Rescue Diver Manual* pp. 57-59.)
9. Explain why an unconscious, non-breathing diver should be resuscitated while being towed to shore even if no pulse is suspected. [PADI *Rescue Diver Manual* p. 161]
10. Explain what action should be taken for a diver suffering from decompression sickness, and under what circumstances the victim should be taken back into the water for recompression. [2-37] (Also see PADI *Rescue Diver Manual* pp. 63-68.)
11. State the compression-to-ventilation ratio for administering one-person CPR. [PADI *Rescue Diver Manual* pp. 40-41]
12. Given the nature of the circulation of major ocean currents (Coriolis effect), state the direction of flow for such currents in relation to the coastline of any continent. [4-11 to 4-12]
13. State the guideline for the recovery of a negatively buoyant object without the assistance of a lift bag. [Adventures in Diving p. 195.]
