Political Strategies and Social Movements in Latin America Leonidas Oikonomakis, 2018-07-12 This book investigates how social movements form their political strategies in their quest for social change and when they shift from one strategy to another why and how that happens The author creates a model which distinguishes between two different roads to social change one that passes through the seizure of state power and one that avoids any relationship with the state Comparing the cases of two Latin American social movements the Zapatistas in Mexico and the Bolivian Cocaleros the volume argues that strategic choices are often decided upon through similar mechanisms Ideal for a scholarly and non specialist audience interested in Mexican and Bolivian politics revolutions and Latin American and social movement studies

antagonism Illiteracy Acosta claims can offer us a way of talking about what cannot be subsumed within prevailing modes of reading such as the opposition between writing and orality that have frequently been deployed to distinguish between modern and archaic peoples and societies This book is organized as a series of literary and cultural analyses of internationally recognized postcolonial narratives It tackles a series of the most important political aesthetic issues in Latin America that have arisen over the past thirty years or so including indigenism testimonio the Zapatista movement in Chiapas and migration to the United States via the U S Mexican border Through a critical examination of the illiterate effects and contradictions at work in these resistant narratives the book goes beyond current theories of culture and politics to reveal radically unpredictable forms of antagonism that advance the possibility for an ever more democratic model of cultural analysis

The Zapatista Experience Jérôme Baschet, 2024-09-24 An exploration of the Zapatista project from its conception to the present On the thirtieth anniversary of the Mayan Indigenous uprising in Chiapas The Zapatista Experience reconstructs the trajectory of the Zapatista struggle over the last three decades both in its concrete achievements and in its contributions to the renewal of critical and antisystemic thinking The Zapatista rebellion has become a reference and source of inspiration for many struggles around the world due to its major contribution in reformulating a credible and desirable path to emancipation a path that broke with previously dominant conceptions state centric productivist Eurocentric modernist and patriarchal Baschet demonstrates how the Zapatistas have succeeded in materializing on a massive scale the concrete experience of another way of living a forerunner of possible emerging worlds The autonomous rebel territories of Chiapas are among the most developed and radical of the real utopias that exist in the world today exceptional in their experiments in self governance and anti State political form argues J r me Baschet The Zapatista Experience orients readers in the profusion of Zapatista writings concerning for example the elaboration of a different understanding of politics the Zapatistas planetary conjunctural analysis of capitalism as a total war against humanity their conception of Indigeneity that breaks with both modernist individualism and identity politics and their notion of time and history All this in clear opposition to neoliberal capitalism

Ghali writes that Prashad has helped open the vista on complex events that preceded today's global situation and standoff. The Poorer Nations looks to the future while revising our sense of the past. **Anarchist Pedagogies** Robert H.

Haworth, 2012-08-01 Education is a challenging subject for anarchists. Many are critical about working within a state-run education system that is embedded in hierarchical, standardized and authoritarian structures. Numerous individuals and collectives envision the creation of counterpublics or alternative educational sites as possible forms of resistance, while other anarchists see themselves as saboteurs within the public arena, believing that there is a need to contest dominant forms of power and educational practices from multiple fronts. Of course, if anarchists agree that there are no blueprints for education, the question remains in what dynamic and creative ways can we construct nonhierarchical, anti-authoritarian, mutual and voluntary educational spaces. Contributors to this edited volume engage readers in important and challenging issues in the area of anarchism and education. From Francisco Ferrer's modern schools in Spain and the Work People's College in the United States to contemporary actions in developing free schools in the U.K. and Canada to direct action education such as learning to work as a street medic in the protests against neoliberalism, the contributors illustrate the importance of developing complex connections between educational theories and collective actions. Anarchists, activists and critical educators should take these educational experiences seriously as they offer invaluable examples for potential teaching and learning environments outside of authoritarian and capitalist structures. Major themes in the volume include learning from historical anarchist experiments in education, ways that contemporary anarchists create dynamic and situated learning spaces and finally, critically reflecting on theoretical frameworks and educational practices. Contributors include David Gabbard, Jeffery Shantz, Isabelle Fremeaux, John Jordan, Abraham P. DeLeon, Elsa Noterman, Andre Pusey, Matthew Weinstein, Alex Khasnabish and many others. Latino History and Culture David J. Leonard, Carmen R. Lugo-Lugo, 2015-03-17

Using a case study approach of Mexico and Venezuela, peasants and lower rural classes are examined at the local, meso and national levels. Additionally, the study analyzes government policies, development and leadership in each country. Latin America has tried to ride the waves of globalization, worldwide economic

and environmental crises the author examines Mexico and Venezuela's relations with the political hegemony of superpowers like the US, EU and China. Community Gardening as Social Action Claire Nettle, 2016-05-23

There has been a resurgence of community gardening over the past decade with a wide range of actors seeking to get involved from health agencies aiming to increase fruit and vegetable consumption to radical social movements searching for symbols of non-capitalist ways of relating and occupying space. Community gardens have become a focal point for local activism in which people are working to contribute to food security, question the erosion of public space, conserve and improve urban environments, develop technologies of sustainable food production, foster community engagement and create neighbourhood solidarity. Drawing on in-depth case studies and social movement theory, Claire Nettle provides a new empirical and theoretical understanding of community gardening as a site of collective social action. This provides not only a more nuanced and complete understanding of community gardening but also highlights its potential challenges to notions of activism, community, democracy and culture.
