The novel's main narrative opens in the marshland near the fictional town of Barkley Cove, North Carolina. Seven-year-old Catherine Kya Clark lives in a shack in the swamp with her mother, father, and siblings. However, one day Kya's mother leaves the shack forever in order to escape the physical abuse inflicted by Kya's father. Kya's siblings soon leave on their own, as well, leaving only Kya and Pa. Pa spends increasingly more time away from the shack over the years, and when Kya is about ten years old, Pa leaves forever. Kya has become thoroughly self-sufficient by this time, living on the land and occasionally trading in town for necessary supplies. When Kya is 14 years old, a kind local boy named Tate Walker begins to visit Kya, and he teaches her how to read. He is about four years older than Kya. He also gives Kya his old textbooks from school. When Kya is 15 years old, she and Tate fall in love, but Tate insists that they do not have sex until Kya is older. Tate soon leaves for college, and although he promises to love and remember Kya, Kya feels abandoned. When Kya is 19 years old, she suddenly becomes attracted to a young local man named Chase Andrews. Chase begins visiting her often. Chase says that he loves her.

and is eager to have sex with her Kya refuses at first but after about a year she consents to sex Tate eventually returns to Barkley Cove in order to perform scientific research on the marshland He visits Kya and asks for forgiveness but she refuses to take him back Tate sees that Kya has performed much of her own research on the marshland and he urges Kya to submit it to publishers Tate also warns Kya that Chase is a dishonest womanizer One day Kya sees in the newspaper that Chase has become engaged to someone else She is heartbroken Later she submits her research to publishers and when she is 22 years old a book of her research is published under her name Kya's brother Jodie sees the book in a store and returns to the swamp to reconnect with Kya Jodie encourages Kya to give Tate another chance Chase eventually visits Kya and says that he wants to continue his relationship with her despite the fact that he is married to someone else When Kya refuses him Chase tries to rape her She hits him and escapes Kya realizes that because Chase is such a popular member of the town and because she is an outcast for living in the swamp she has no recourse One day in October of 1969 Chase's body is found near the swamp He appears to have fallen or possibly have been pushed out of a fire watchtower The sheriff investigates and arrests Kya However the evidence is inconclusive and circumstantial and Kya is acquitted She and Tate declare their love for each other and they live together in the swamp Kya continues her career as a naturalist and Tate continues his career as a researcher Kya dies at age 64 after which Tate finds evidence that seems to prove that Kya killed Chase He disposes of the evidence so that no one will ever find it
